World Banking System:

World Banking, 1963 The Disintegration of the World's Financial System Rolf A. F. Witzsche, 2003 The Global Financial Crisis Mark Taylor, Richard Clarida, 2014-01-02 The global financial crisis has sent shockwaves through the world's economies and its effects have been deep and wide reaching. This book brings together a range of applied studies covering a range of international and regional experience in the area of finance in the context of the global downturn. The volume includes an exploration of the impact of the crisis on capital markets and how corporate stakeholders need to be more aware of the decision making processes followed by corporate executives as well as an analysis of the policy changes instituted by the Fed and their effects. Other issues covered include research into the approach of solvent banks to toxic assets, the determinants of US interest rate swap spreads during the crisis, a new approach for estimating Value at Risk, how distress and lack of active trading can result in systemic panic attacks and the dynamic interactions between real house prices, consumption expenditure and output. Highlighting the global reach of the crisis, there is also coverage of recent changes in the cross currency correlation structure, the costs attached to global banking, financial integration, the interrelationships among global stock markets, inter temporal interactions between stock return differential relative to the US and real exchange rate in the two most recent financial crises and research into the recent slowdown in workers remittances. This book was published as a special issue of Applied Financial Economics.

Financial Sector Reform N. Mathieu, 1998 Soon after its declaration of independence Lithuania launched a program of market based economic reforms that achieved remarkable results. However a banking crisis erupted in January 1996 driven by a combination of ineffective bank supervision, poor bank practices and deep rooted sectoral imbalances. With financial support from the World Bank Lithuanian authorities embarked on a broad economic reform program with two immediate objectives: the resolution of the banking system's operational and undercapitalization problems and a reduction in the most severe imbalances in the economy.
