World Inequality:

World Inequality Report 2018 Facundo Alvarez, Lucas Chancel, Thomas Piketty, Emmanuel Saez, Gabriel Zucman, 2018-07-09 World Inequality Report 2018 is the most authoritative and up to date account of global trends in inequality. Researched, compiled and written by a team of the world's leading economists, it presents with unrivaled clarity and depth information and analysis that will be vital to policy makers and scholars everywhere. [Elite Quality Index 2025](#)

Tomas Casas i Klett, Guido Cozzi, 2025-07-15 The Elite Quality Index 2025: The Sustainable Value Creation of Nations. EQx2025, the leading global political economy index, is a comparative ranking measuring the sustainability of nations that assesses whether elites create value and expand a nation's knowledge capabilities or use their power to rent seek and maximize their own profits by transferring value from their stakeholders. The EQx2025 uses 149 indicators to analyze 151 countries and measures conceptual elements such as Power, Creative Destruction, and Unearned Income to determine whether the elites of a given country create or extract value from their nation. Elites are defined as those that lead a society's most important business models and range from technology giants to labor unions with members including business, political, and knowledge elites. Their collective coordination capacity helps them to leverage their power and influence over institutions. A nation's elite system and its most powerful business models are essential for value creation and economic and human development. The report describes high quality elites as those that can increase or grow the overall size of the economic pie, while low quality elites use their power advantages to grow their own slice at the cost of others.

World Inequality Report 2022 Lucas Chancel, Thomas Piketty, Emmanuel Saez, Gabriel Zucman, 2022-11-01 World Inequality Report 2022 is the most authoritative and comprehensive account of global trends in inequality, providing cutting edge information about income and wealth inequality and also pioneering data about the history of inequality, gender inequality, environmental inequalities, and trends in international tax reform and redistribution. *Mastering the Universe*

Rob Larson, 2024-08-20 Economist Rob Larson combines wit, righteous anger, and clear-eyed analysis as he dissects the lifestyle, moral bankruptcy, and stupidly large sums of money hoarded by the disgustingly wealthy. The fact that we live in one of the most unequal societies in the history of the world is becoming common knowledge. And while lists of the richest people in a country may be easy to come by, how much do we really know about the billionaires who sit atop our global economic system? Who are they really? How did they accumulate their ill-gotten gains? And what kind of depravities do they use to maintain their positions? Turning their own weapons of class war against them from the fawning profiles found in the Mansion section of the Wall Street Journal to the national income data buried in white papers meant solely for investors and technocrats, Larson crunches the numbers so you don't have to. But he doesn't stop there because appreciating the sheer scale of the global wealth gap doesn't even touch on all the ways the ruling class are making us miserable, breaking our society to pieces, and destroying the planet in their pursuit of ever-increasing power and profit. As we behold whole continents on fire, pandemics

thrashing public health systems to smithereens and declining lifespans for the vast majority Larson argues that the only way forward is to yank on the emergency break and give capitalism the boot

The Autocrat's Predicament Timothy R. Heath,2023-11-03 In their quest for national revival China's leaders under Xi Jinping have sought to improve the economy's performance The disappointing economic record of authoritarian regimes provides ample grounds for doubt yet not all have failed Why have some succeeded where most did not The theory of the enabling condition highlights the central role that politics plays in the pursuit of economic advancement The theory explains that a political situation characterized by a strong central leadership weak elite opposition and a united public offers favorable prospects for enacting concentrated growth policies This arrangement

enables the central leadership to enlist the public in convincing elites to implement policies that they might otherwise resist Focusing on the experience of single party authoritarian regimes *The Autocrat's Predicament: The Political Peril of Economic Upgrade in Single Party Authoritarian Regimes* examines episodes in the histories of the People's Republic of China, Taiwan, and the Soviet Union. It concludes that China's unfavorable political situation could be potentially unfriendly for its ambitions to build an efficient, highly productive economy.

Globalization and Poverty Ann Harrison, 2007-11-01 Over the past two decades, the percentage of the world's population living on less than a dollar a day has been cut in half. How much of that improvement is because of or in spite of globalization? While anti-globalization activists mount loud critiques and the media report breathlessly on globalization's perils and promises, economists have largely remained silent, in part because of an entrenched institutional divide between those who study poverty and those who study trade and finance. *Globalization and Poverty* bridges that gap, bringing together experts on both international trade and poverty to provide a detailed view of the effects of globalization on the poor in developing nations, answering such questions as: Do lower import tariffs improve the lives of the poor? Has increased financial integration led to more or less poverty? How have the poor fared during various currency crises? Does food aid hurt or help the poor? *Poverty*, the contributors show here, has been used as a popular and convenient catchphrase by parties on both sides of the globalization debate to further their respective arguments. *Globalization and Poverty* provides the more nuanced understanding necessary to move that debate beyond the slogans.

Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life, as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change, these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington DC. The resources to address these challenges are there; what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics, explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

[Less Is Not Enough](#) Miriam Meissner, 2026-03-19 A fascinating look at the rise of minimalist self-help, showing how it depoliticizes middle-class frustrations with capitalist exploitation and proposes a cultural strategy to channel minimalist desires into a more radical postgrowth politics.
