Advancing Methods for Biomolecular Crystallography Randy Read, Alexandre G. Urzhumtsev, Vladimir Y. Lunin, 2013-04-03 This work presents a snapshot of the state of the art of modern biomolecular crystallography from crystallisation through structure determination and even interactive presentation on the web Methods driving the latest automated structure determination pipelines are explained as well as how to deal with problems such as crystal pathologies that still demand expert analysis These methods are illustrated through their application to problems of great biological interest such as the molecular machinery underlying the complement pathway the mechanism of action of monoamine oxidase inhibitors and the structure of the eukaryotic ribosome Complementary approaches such as neutron diffraction small angle X ray scattering coherent diffraction and computational modelling are also explored

Project-Based Learning Applied to the Language Classroom Juliana Franco Tavares/ Louise Emma Potter, 2018-03-05 In Project Based Learning Applied to the Language Classroom the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language It is about teaching English as a second or foreign language using Project Based Learning PBL We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it but feel that there aren t enough materials based on this methodology In fact most researchers and writers we have come across discuss the applications of PBL in the students mother tongue to subjects such as Math History Literature Social

Studies and Science However there are few published works about the specifics of PBL in foreign language classes Besides it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language

Sandbogs and Black Lights Stephen R. Wilk,2021 In the almost twenty years since I began writing my essays on strange and quirky optics I have been through several employers but in all that time I have stayed a contributing editor for the Optical Society of America No matter where I was during the day I always worked on producing these nuggets of infotainment with some regularity I have always had a backlog of tentative pieces to write but new topics arose just as rapidly so I have never been at a loss with a new piece The newsletter of MIT s Spectroscopy Lab has in that time disappeared so the essays in this volume are either ones that originally appeared in Optics and Photonics News or else have not previously been published in any magazine As I stated in the introduction to How the Ray Gun Got Its Zap my goal was to produce quirky interesting and somewhat humorous essays that had a slyly pedagogical edge Education by stealth as the BBC said In reality I often start off writing one of these to satisfy myself about some minor mystery of optical science or engineering
