The Monad In Evolution:

The Monad in Evolution Annie Wood Besant, 2005-12 This scarce antiquarian book is a facsimile reprint of the original. Due to its age it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving and promoting the world's literature in affordable, high-quality modern editions that are true to the original work. **Monad to Man**

Michael Ruse, 2009-06-30 In interviews with today's major figures in evolutionary biology including Stephen Jay Gould, E. O. Wilson, Ernst Mayr, and John Maynard Smith, Ruse offers an unparalleled account of evolutionary theory from popular books to museums to the most complex theorizing at a time when its status as science is under greater scrutiny than ever before.

Involution and Evolution According to the Philosophy of Cycles Kalpa, 1894 **Planetary Rounds of the Divine Monad** Helena Petrovna Blavatsky, 2017-08-23 Overview of the doctrine of septenary chains of worlds in the Solar Kosmos. A Master of Wisdom explains the struggle of Monadic Consciousness passing through seven man-bearing planets. At the dawn of a new Solar Manvantara, progressed entities from the previous manvantara are born in the First Race of the First Round, ahead of the Elementals and remain as latent, inactive spiritual force in the aura of the nascent world of the new manvantara until the stage of human evolution is reached. They will have then to accept to the last drop in the bitter cup of retribution. The passage of human races in between planets being critical, requires the presence of a Dhyani Chohan. Gautama is the fifth leader and spiritual teacher in this round on this planet, and the fourth who became Buddha. The one who will appear at the close of the Seventh Root Race before the occupation of the next higher planet by humanity will again be a Dhyani Chohan. At the beginning of each round, it is the duty of the First Race to choose fit recipients among its sons as vessels to contain the whole stock of knowledge to be divided among future races and generations until the close of that round. Every round on the descending arc is but a repetition in a more concrete form of the previous round, a grosser and more material copy supervised and guided by special Builders and Watchers. Rounds and their role in the serial evolution of nascent material nature is explained cosmologically and anthropologically. Earth as we know her now had no existence before the Fourth Round. In the First Round, our planet was fiery, cool and radiant like its ethereal men and animals, luminous, more dense and heavy during the Second, watery during the Third. But the Elements have been since reversed, none were then as they are today. In the course of the rounds, Earth is being progressively spiritualised. She will reach her true ultimate form corresponding inversely to that of man after the Seventh Round at the close of the manvantara. There is a predestined moment in the geological life of our globe, as in past and future chronicles of races and nations, when effects will once again reconcile with causes and the original balance restored. Genesis, six days of creation, meant six periods of evolution plus a seventh that of culmination of perfection, not of rest, and correspond to our Seven Rounds and Races. Man was on earth in this round from the very beginning, having passed through all the kingdoms of nature in the previous three rounds. His inner

constitution reflects the evolution of the first Three Root Races His Fifth Principle Manas was quickened at the close of the Third Race That of the animals remains inactive paralysed Though the human embryo has no more of the ape in it than of any other mammal it contains in itself the totality of all kingdoms of nature Intellect and materiality always precede intelligence and spirituality Physical intelligence is but the mask of spiritual intelligence There is a spiritual a psychic an intellectual and an animal evolution from the highest to the lowest as well as a physical development from the simple and homogeneous up to the more complex and heterogeneous Mind moves matter Without mind the Divine Monad has no hold upon the mere form It is like the breeze where there is no tree or branch to receive and harbour it The evolution of the human body is governed by terrestrial forces that of the thinking man by spiritual forces Every form on earth every atom in Space strives to follow the model placed for it in the Ideal Man Molecularly constituted matter is not man s grossest aspect The vulgar and vile middle principle is the most offensive and sole stumbling block to progress The Angels doomed to embodied existence are still in chains of flesh under the darkness of ignorance They remain unrecognised and unthanked in the injustice of the human heart until the Great Day that will come after the Seventh Round in post manvantaric Nirvana Then the Dhyani Buddhas and the Planetary Spirits who laboured for long kalpas without condition or any hope for reward will have their rest The chief object of our struggles and initiations is to achieve this union while yet on this earth Those who will be successful have nothing to fear during the fifth sixth and seventh rounds says a Master of Wisdom Round 1 builds sthula sharira Round 2 forms linga sharira Round 3 breathes prana Round 4 arouses kama Round 5 uplifts manas Round 6 activates buddhi Round 7 merges the human monad into Atman the Divine Monad Appendix A Esoterically Manu Vaivasvata the Progenitor of our Fifth Race is one of forty nine that emanated from the Root Manu Exoterically he figures as seventh because this round though the fourth is in the preseptenary Manvantara and the round itself is in its seventh stage of materiality or physicality Manu Vaivasvata though seventh in the order given is the primitive Root Manu of the fourth Human Wave while our Vaivasvata was but one of the seven Minor Manus who preside over the Seven Races of our planet Appendix B Duration of each Planetary Round in this Minor Manvantara Duration of humanity in this Round on each Planet Duration of human life waves in this Round on Planet Earth Appendix C Genesis three Adams untangled Adam 1 is Kadmon or the Heavenly Man made in the image and likeness of god i e Second Logos Adam 2 was neither in the image nor in the likeness of god before he ate the forbidden fruit i e the mindless hence sinless First Root Race Adam 3 is the Third Root Race that separated whose eyes opened outwardly and acquired knowledge of good and evil The Jewish Kabbalists dwarfed the duration of each terrestrial round by six zeros Allusions to the septenary constitution of earth and man and to the Seven Rounds and Races abound in the New as in the Old Testament The Seven Sabbaths are seven pralayas between seven manvantaras or what we call rounds More allusions about meat offerings to the Lord the woman in purple and scarlet the mystery of the woman and the beast and other instances of farcical worship unpicked Studies in Evolution Henry T. The Monads of Leibniz are the Jivas of Occultism, a Unity of mathematical points in boundless Space Helena Petrovna Blavatsky, Carl Taylor-Robinson, 2022-08-05 Esoteric Science strives to enlarge the domain of physical science by trespassing on the forbidden grounds of metaphysics so distasteful to some materialists Though modern scientists learned as they may be all their wonderful discoveries would go for nothing and they themselves remain for ever headless bodies unless they lift the veil of matter and strain their eyes to see beyond The extent depth breadth and length of the mysteries of Nature are to be found only in Eastern Esoteric Sciences So vast and so profound are these that hardly a few a very few of the highest Initiates are capable of assimilating that which is good pure and holy and penetrate into the arcana behind the veil Without throwing any discredit upon time honoured beliefs we draw a line between blind faith evolved by theologies and the knowledge compiled and validated by generations of eastern adepts and seers in short between faith and true philosophy i e the Wisdom of Love not the love of wisdom as the term is commonly interpreted The ten precious Cosmic Seeds brought to Magna Graecia from old India by the great Ionian Sage eclipsed all those Theogonies and angelologies that ever emanated from the theological brain The ten mathematical points inscribed within the Pythagorean Triangle transcend the limits of the lower mind and elevate the apperceptions of the spiritual thinker into the realm of primal causes Along with the plane Cube and Circle the Abstract Triangle is the cornerstone of cosmic philosophy and symbol of the manifested universe The equilateral Triangle is the trinity of the first differentiated Substance or the consubstantiality of Spirit Matter Universe the Son who unfolds from the Unity of Logos Aristotle was not an initiate He misrepresented Plato mocked Pythagoras and by omitting the Point and the Circle and by ignoring the Apex he demeaned the application of geometry to Cosmic and Divine Theogony Thus the pupil of Plato succeeded in dwarfing the Majesty of the Ideal Triangle to a simple triad line surface body His modern heirs who play at Idealism have interpreted these geometrical figures as space force matter Those like Aristotle and others who did not adhere the mathematical correctness of Plato's deductive reasonings and did not proceed top down from universals down to particulars begun symbolizing their philosophies and religions by sexual emblems As an emblem applicable to the objective idea the Triangle became a solid When repeated in stone on the four cardinal points it assumed the shape of the Pyramid symbol of the phenomenal merging into the Noumenal Universe of Thought at the Apex of the four triangles The Apex itself is lost in the Unseen Universe from whence started the first race of the spiritual prototypes of man The protyle or undifferentiated cosmic matter of our most eminent chemists and physicists is the basic line of the Pythagorean Triangle the grandest conception imaginable for it symbolizes both the Ideal and the Visible Universes In the realm of the Esoteric Sciences the unit divided endlessly instead of losing its unity approaches with every division the planes of the only eternal Reality which the Seer can follow and behold it in all its pregenetic glory The Monads in the present dissertation are distinct atomic Souls before they descend into terrestrial form Their descent into concrete matter marks the medial point of their own individual pilgrimage Here losing in the mineral kingdom their individuality they begin ascending

through the seven states of terrestrial evolution to that point where a correspondence between the human and divine consciousness is firmly established At present however we are not concerned with their terrestrial trials and tribulations but with their life and behaviour in Space on planes wherein the eye of the most intuitional chemist and physicist cannot reach them Leibniz was not an Initiate not even a mystic only a very intuitional philosopher Yet no psycho physicist ever came nearer than he has to the mysteries of cosmic evolution Let not the word Psychology cause the reader to carry his thought by an association of ideas to modern Psychologists so called whose idealism is another name for uncompromising Materialism and whose pretended Monism is no better than a mask to conceal the void of final annihilation even of consciousness An idea has no subsistence by itself but gives figure and form unto shapeless matter and becomes the cause of the manifestation Once the idea of protyle is accepted Chemistry will have virtually ceased to live it will reappear in its reincarnation as New Alchemy or Metachemistry For what are the manifested Mother the Father Son Husband and the Son the three First born but Hydrogen Oxygen and that which in its terrestrial manifestation is called Nitrogen The Monads of Leibniz may from one point of view be called force from another matter To Occult Science force and matter are two sides of the same Substance These Monads every one of which is a living mirror of the universe each Monad reflecting each other are hidden in a veil of thick darkness forming mirrors of the atoms of the world and casting reflections from its own face on every atom Where then is the Ultimate Element As we advance it recedes like the tantalizing mirage lakes and groves seen by the tired and thirsty traveller in the desert The very idea of an element as something absolutely primary and ultimate seems to be growing less and less distinct Occult Science teaches that Mother lies stretched in infinity during Pralaya as the Great Deep the dry Waters of Space and becomes wet only after the separation and the moving over its face of Narayana the Spirit which is an Invisible Flame that never burns but which sets on fire all that it touches and gives it life and generation Hydrogen and oxygen which instil the fire of life into the Mother is Spirit the noumenon of that which becomes in its grossest form oxygen hydrogen and nitrogen on earth nitrogen being of no divine origin but merely an earth born cement to unite other gases and fluids and serve as a sponge to carry in itself the breath of Life pure air There is no such thing in Nature as inorganic inanimate substances Stones minerals rocks and even chemical atoms are simply organic units in profound lethargy Their coma comes to an end when their inertia becomes activity The divisions made by Leibniz however incomplete and faulty from the standpoint of Occultism show a spirit of metaphysical intuition to which no man of science not Descartes not even Kant has ever reached With him there always existed an infinite gradation of thought Only a small portion of the contents of our thoughts rises into the clearness of apperception into the light of perfect consciousness From the shock of Leibniz and Spinoza's systems as opposed to the Cartesian system emerge the truths of the Archaic doctrine Both opposed the metaphysics of Descartes his idea of the contrast of two substances extension and thought radically differing from each other and mutually irreducible was too arbitrary and too unphilosophical for them What Leibniz calls Monads and Eastern

philosophy Jivas is the Unity of units immaterial and infinite They are with us as with Leibniz the expression of the universe and every physical point is but the phenomenal expression of the noumenal metaphysical point Leibniz's distinction between perception and apperception is the philosophical though dim expression of the Esoteric teachings Every Monad differs from each other qualitatively and every one is a peculiar world to itself But this is not so with atoms they are absolutely alike quantitatively and qualitatively and possess no individuality of their own To Leibniz atoms and elements are centres of force or rather spiritual beings whose very nature is to act The molecules of materialistic philosophy are extended and divisible while Monads are mere mathematical points and indivisible At this point the Monads of Leibniz closely resemble the Elementals of mystic philosophy Every Monad or Elemental is a speaking mirror Esoteric philosophy teaching an objective Idealism draws a practical distinction between collective illusion from the purely metaphysical standpoint and the objective relations in it between various conscious Egos so long as this illusion lasts The adept therefore may read the future in an Elemental Monad but he has to draw for this object a great number of them as each Monad represents only a portion of the Kingdom it belongs to

The Evolution of Consciousness Leonard Hall,1901 The Secret Doctrine: The Synthesis of Science, Religion, and Philosophy Helene Petrovna Blavatsky,1888 **The Seven Principles of Man** Annie Wood Besant,1892 **The Theosophical Path** Katherine Augusta Westcott Tingley,1925 **The Secret Doctrine: Cosmogenesis** Helena Petrovna Blavatsky,1893 **The Secret Doctrine: The Synthesis of Science, Religion, and Philosophy Volume I: Cosmogenesis** Helena Petrovna Blavatsky,2018-02-24 The first book in the monumental work of Theosophic thought This book focuses on gaining occult power in the formation of the universe and the cosmos This group sought to learn the secrets of nature science and divinity in order to empower themselves to godhood and this book reveals their secrets as to how knowledge to do this can be attained It does not reveal what the ultimate saving knowledge is that can do this but it gives guidelines on how to start the journey for yourself *American Theosophist* ,1908 **The Theosophist** ,1921 *Golden Keys to Ascension and Healing* Joshua David Stone,1998-05-01 This volume represents the wisdom of the ascended masters condensed into concise keys that serve as a spiritual guide There are 420 golden keys that present the multitude of methods techniques affirmations prayers and insights Dr Stone has gleaned from his own background in psychology and life conditions and his thorough research of all the ancient and contemporary classics that speak of the path to God realization The teachings of Sai Baba and other ascended masters are at the core of these keys and the author has also drawn up on various spiritual scriptures such as the Bhagavad Gita and the Bible Especially valuable are practical methods to support the ascension process such as journal writing and spiritual logs as well as meditations and prayers *The Coming Age* ,1900 The Ancient Wisdom Annie Besant,1897 *The Jewel in the Lotus* Dr. Douglas M.
