Chittick,2010-03-31 Ibn al Arabi is still known as the Great Sheik among the surviving Sufi orders Born in Muslim Spain he has become famous in the West as the greatest mystical thinker of Islamic civilization He was a great philosopher theologian and poet William Chittick takes a

major step toward exposing the breadth and depth of Ibn al Arabi's vision. The book offers his view of spiritual perfection and explains his theology, ontology, epistemology, hermeneutics, and soteriology. The clear language, unencumbered by methodological jargon, makes it accessible to those familiar with other spiritual traditions, while its scholarly precision will appeal to specialists. Beginning with a survey of Ibn al Arabi's major teachings, the book gradually introduces the most important facets of his thought, devoting attention to definitions of his basic terminology. His teachings are illustrated with many translated passages introducing readers to fascinating byways of spiritual life that would not ordinarily be encountered in an account of a thinker's ideas. Ibn al Arabi is allowed to describe in detail the visionary world from which his knowledge derives and to express his teachings in his own words. More than 600 passages from his major work, *al-Futuhāt al-Makkiyya*, are translated here, practically for the first time. These alone provide twice the text of the *Fusus al-Hikam*. The exhaustive indexes make the work an invaluable reference tool for research in Sufism and Islamic thought in general.

It deserves to be thoroughly and systematically elaborated because it attempts to propose a new foundation for dialectical materialism. *Books In Print 2004-2005* Ed. Bowker Staff, Staff Bowker, Ed., 2004 Hegel's Critique of Essence Franco Cirulli, 2013-10-14 This volume shows how The Doctrine of Essence intersects with perennial philosophical questions, including above all the relationship between freedom and determinism. The Doctrine of Essence is of central importance since it is a critical description of traditional categories which also functions as the justification of Hegel's speculative understanding of essence. This study takes an historical approach to build upon Hegel's abstract argument, viewing it as a confrontation with his predecessors, in particular Fichte and Schelling.
