Ball, Kathryn J. Hannah, Ulla Gerdin Jelger, Hans Peterson, 2013-11-11 Nursing like other health related professions is information intensive The quality of care a patient receives is based on the soundness of judgment exercised by the health care team Underlying sound judgment is up

to date information Unless nurses have access to accurate and pertinent information the care being rendered will not be of the highest standard What is required is not necessarily more rapid and efficient information services Modern technology can process immense amounts of data in the blink of an eye What we in the health professions need are information systems that are more intelligent systems that can integrate information from many sources systems that analyze and synthesize information and display it so that it may be applied directly in patient care in other words information that answers a question or even gives practical advice In order to accomplish such objectives work is needed to establish the scientific and theoretical basis for the use of computing and information systems by health professionals This is the research component In addition there is the need for continued development and evaluation of practical information systems

**Patient Care Information Systems** Erica L. Drazen, Jane B. Metzger, Jami L. Ritter, Mark K. Schneider, 2012-12-06 In the current era of health care reform the pressures to truly manage patient care and to build effective integrated delivery systems are generating intense interest in patient care information systems Health care institutions cannot provide seamless access to care without seamless access to information and they cannot manage and improve care without improved information management Patient Care Information Systems examines how to design and implement these systems so they successfully meet the needs of physicians nurses and other health care providers In one convenient reference the authors summarize and synthesize previously disparate research and case experiences on these systems and suggest future directions based on the evolving demands of administrators and caregivers

*Nursing Informatics '91* Patsy B. Marr, Rita L. Axford, Susan K. Newbold, 2013-04-09 For over a decade Working Group 8 Nursing of the International Medical Informatics Association has sponsored in conjunction with a host country a triennial international symposium on nursing informatics Each conference consists of a main conference and an invitational working conference following the main event In 1991 the symposium was held in Melbourne Australia and hosted by the Nursing Computer Group Victoria and the Royal College of Nursing Australia Nine Pre Conference workshops offered participants indepth exploration of a variety of information technology topics The main conference attracted 700 participants from 19 countries and over 150 peer reviewed papers The invitational working conference was held at Whitehall in Sorrento Victoria and involved the individual and collective work of 40 experts in nursing informatics from around the world This group addressed the theme HEALTH CARE INFORMATION TECHNOLOGY IMPLICATIONS FOR CHANGE Health care organizations are faced with growing demand for information technology and must cope effectively with the processes and outcomes of its introduction As the impact of information technology is felt both on the local and the global level the conference selected for its theme a three tiered approach to information technology and organisational change through the lens of society the organization and the individual The conference was organized around three forms of contribution plenary talks working groups and individual contributions by the participants Part one of this book contains the papers of the plenary speakers for the conference

**Introduction to Nursing Informatics** Kathryn J.

Hannah, Marion J. Ball, Margaret J.A. Edwards, 2013-04-17 This series is intended for the rapidly increasing number of health care professionals who have rudimentary knowledge and experience in health care computing and are seeking opportunities to expand their horizons. It does not attempt to compete with the primers already on the market. Eminent international experts will edit or contribute to each volume in order to provide comprehensive and current accounts of innovations and future trends in this quickly evolving field. Each book will be practical, easy to use, and well referenced. Our aim is for the series to encompass all of the health professions by focusing on specific professions such as nursing in individual volumes. However, integrated computing systems are only one tool for improving communication among members of the health care team. Therefore, it is our hope that the series will stimulate professionals to explore additional means of fostering interdisciplinary exchange. This series springs from a professional collaboration that has grown over the years into a highly valued personal friendship. Our joint values put people first. If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients, then our efforts will have succeeded.

**Attitude of Nurses Towards Uses of Computer in Nursing Practice** Vadivukkarasi

Ramanadin, 2014-04-01 In many of the countries, nurses are overburdened with paper and pen work rather than providing nursing care. This traditional method must be changed with recent advancement and techniques. Many of the nurses are not willing to change this traditional method. The researcher made an attempt to explore the attitude of nurses towards computer application in nursing care. Findings of the study suggest that hospital organization should take an initiative to organize and conduct in-service education programs on computers in health care and nursing informatics.

Management and Leadership for Nurse Managers Russell C. Swansburg, 1996

This edition of the highly acclaimed Management and Leadership for Nurse Managers offers theoretical and practical perspectives on the major management functions as they are practiced in today's organizations. The author introduces current and future nurse managers to the challenges of planning, organizing, leading, and controlling. The most recent research on management theory is incorporated throughout the book in the context of its practical application. New coverage includes total quality management, pay for performance, the rising temporary workforce, and downsizing.
