Using The Graphics Calculator:

Insights Into Calculus with the Graphics Calculator Roland E. Larson, Robert P. Hostetler, Herbert Hollister, Bruce H. Edwards, 1993 This useful laboratory manual facilitates the use of graphics calculators to expand students conceptual understanding of calculus Designed to enhance any calculus text the manual s 360 exercises provide discussions of key topics over 110 examples and more than 300 figures taken directly from graphics calculator displays The first exercise introduces students to the use of graphics calculators using TI 81 notation but nearly all the techniques can easily be used with any graphics calculator All exercise sets are calculator independent Programs for eight specific types of calculations from approximating zeros to finding the sum of a series are incorporated throughout the text The programs are also listed in TI 81 TI 85 and Sharp 9200 9300 formats in an appendix

Insight Into Calculus Frank Ward, Doug Wilberscheid, 1996-10 For calculus courses requiring the use of graphing calculators The main purpose of the projects in this book is to help students gain a better understanding of calculus through a guided discovery approach The book is designed to help students develop the skills of thinking analytically recognizing patterns forming conclusions and organizing results in a clear manner

The First Sourcebook on Asian Research in Mathematics Education - 2 Volumes Bharath Sriraman, Jinfa Cai, Kyeonghwa Lee, Lianghuo Fan, Yoshinori Shimizu, Chap Sam Lim, K. Subramaniam, 2015-08-01 Mathematics and Science education have both grown in fertile directions in different geographic regions Yet the mainstream discourse in international handbooks does not lend voice to developments in cognition curriculum teacher development assessment policy and implementation of mathematics and science in many countries Paradoxically in spite of advances in information technology and the flat earth syndrome old distinctions and biases between different groups of researcher s persist In addition limited accessibility to conferences and journals also contribute to this problem The International Sourcebooks in Mathematics and Science Education focus on under represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education The First Sourcebook on Asian Research in Mathematics Education China Korea Singapore Japan Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world The book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe North America and other countries in addition to serving as a platform to showcase existing research that has shaped teacher education curricula and policy in these Asian countries The book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside Asia and complement the Nordic and NCTM perspectives
