

# Viking 1

The Viking 1 was a spacecraft sent to Mars by NASA in 1975 to study the planet's surface, weather, and atmosphere. It had an orbiter and a lander that sent back the first images from the Martian surface. The mission helped scientists learn more about the planet and paved the way for future exploration.

**Planetary Geology** ,1998      **To See the Unseen** Andrew J. Butrica,1996      **Mars** Hugh H. Kieffer,Bruce M. Jakosky,Conway W. Snyder,Mildred Shapley Matthews,2018-01-30 The planet Mars has been a subject of wonder for millennia as attested by its place in mythology by later speculation about its canals and by the scientific and public excitement over the Viking mission Although the scientific literature about the planet is voluminous no comprehensive treatment of the results of modern spacecraft exploration has yet been made available This volume fills that gap by providing a summary of what is presently known about Mars and identifying many puzzles such as polar cap variance occurrence of dust storms and the possible location of water The introductory chapter cites questions controversies and milestones in the study of Mars and also includes an annotated book list basic data about the planet and a guide to Martian seasons A chapter on telescopic observation credits the contributions made by many amateurs that have advanced our knowledge of variations observed on Mars A chapter on spacecraft exploration by an American and a Russian author who have participated in all Mars missions includes a revelation of an additional Soviet attempt Twenty nine technical articles cover geophysics bedrock geology surface atmosphere exosphere and magnetic field and climate history Two chapters address the search for life on Mars three concluding chapters consider the Martian satellites An indispensable reference for scientists Mars will also serve as a complete sourcebook for serious amateur astronomers

**Planetary Landscapes** R. Greeley,2013-04-17 The objective of this book is to introduce the surface of the objects in the Solar System the individual treatment features of the planets and satellites in the context of varies among the chapters For example it was difficult geomorphic processes Introductory chapters include the to decide what to leave out of the chapter on Mars because bows and whys of Solar System exploration and a so much is known about the surface whereas data are review of the primary processes that shape our planet rather limited for Mercury Earth and which appear to be important to planetary In addition to introducing the geomorphology of plane sciences The remaining chapters describe the geomor tary objects this book is intended to be a source for phology of the planets and satellites for which data are obtaining supplemental information References are cited available For most of these objects the general physiog throughout the text However these citations are not raphy and terrain units for each are introduced then the intended to be exhaustive but rather are given to provide geomorphic processes that are inferred for the develop a springboard for additional literature surveys
