## Wayward Technology:

*Wayward Technology* Ernest Braun, 1984      **Wayward Technology** Ernst Braun, 1984      Technology and the Contested Meanings of Sustainability Aidan Davison, 2001-04-19 This discussion responds to the work of Langdon Winner Albert Borgmann Charles Taylor Martin Heidegger David Abram and others **BOOK JACKET**      **Technology in Context** Ernest Braun, 2005-06-23 Most managers know very little about the technology they introduce into their firms often preferring to leave such decisions to a small band of technological experts As a result large amounts of time and money are often wasted on inappropriate and inefficient systems The cost of retraining and reorganising can also be prohibitive if the new technology does not deliver the desired results In a business environment where technology is of increasing importance the non technical manager cannot afford to remain in the dark **Technology in Context** provides a toolkit of approaches to this difficult subject Subjects covered include the fundamental concepts required for the management of technology the gathering of information in a firm to support strategic decisions on technology technology assessment in the public domain the wider social implications of technology problems associated with technology from the danger of environmental degradation to employment and skills      Technology and Culture ,1986      *Permit But Discourage* William A. Bogart, 2011 This text analyzes the effectiveness of law in controlling excessive consumption It engages theoretical discussions concerning the effectiveness of legal intervention especially regarding normativity the relationship between law and norms      **The Technical World** ,1904      *InfoWorld* ,1991-11-11 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects      **Future Survey Annual 1985** Michael Marien, 1987-01-01      **Technology Policy** Georg Aichholzer, Gerd Schienstock, 1994 No detailed description available for Technology Policy      **Technology and Information Services** Carol L. Anderson, Robert Hauptman, 1993 This handbook provides helpful guidance for the information services practitioner and manager It contains a wealth of concrete information necessary for managing technology and its applications and for providing technological leadership Although there are a plethora of monographs allocated to general and specific aspects of automation computerization and technological innovation in libraries and information centers this volume is unique in offering a conceptual framework for implementing and managing technologies plus a detailed discussion of technologies in relation to both the needs of information seekers and the changes they have wrought in delivering services to users The volume will also be of interest to students because it provides a historical context for recent changes brought about by technological applications describes current practices and explores issues and trends on the horizon      **International Journal of Technology Management** ,1986      **Technology Assessment in a Dynamic Environment** Marvin J. Cetron, Bodo Bartocha, 1973      **Beyond the Technology Race** Annemieke J. M. Roobeek, 1990 During the 1980s governments in all industrial countries have tightened their grip on technological development This book illustrates the technology race between seven industrial countries in the

field of information technology biotechnology and new materials However the analysis of a government s role in technological development goes beyond the simple comparison of financial efforts and policy measures The policies of seven countries are analysed in their specific national context and much attention is paid to the differences in industrial structure the different social and institutional settings and national traditions in government intervention In order to gain insight into the diffusion of new technologies and the shifts in international competitive relations it is necessary to focus on the social base for technological change among the industrial countries In this context there is fundamental work to do for economists political scientists sociologists policy makers technical engineers consultants managers in strategic planning and human resources and so on

**Society, Ethics, and Technology** Ralph Edelbach, Morton Emanuel Winston, 2006 How do technology innovations create new ethical problems for our society SOCIETY ETHICS AND TECHNOLOGY presents historical social and philosophical perspectives on technological change and its social consequences Providing a strong foundation in both theoretical and applied ethical matters this anthology encourages you to consider the social effects of the technology that surrounds you in your everyday life
