

# Why do birds Migrate?

- ❖ The changing seasons can transform a comfortable environment of a bird into an unlivable one -- the food and water supply can dwindle or disappear, plant cover can vanish, and competition with other animals can increase.

Nature has provided methods for coping with the situation.

**Hibernation:** involves entering a dormant state during the winter season.

**Migration:** involves escaping the area entirely. Because of the powers of flight, most birds adapt to seasonal changes in the environment by migrating.

**The Teacher's Handbook to the Circle of Knowledge** Charles Baker, 1857     *The Art of Falconry*, by Frederick II of Hohenstaufen Frederick II (Holy Roman Emperor), Casey Albert Wood, Florence Marjorie Fyfe, 1943-06. *De Arte Venandi cum Avibus* was written shortly before the year 1250 by Frederick II Holy Roman Emperor King of Sicily and Jerusalem in whose court with its remarkably cosmopolitan and highly intellectual life may be found the real beginning of the Italian Renaissance. In spite of its title it is far more than a dissertation on hunting. There is a lengthy introduction dealing with the anatomy of birds, an intensely interesting description of avian habits and the excursions of migratory birds. Indeed this ancient book has long been recognized as the first zoological treatise written in the critical spirit of modern science. The sumptuous volume now in hand is however the first translation into English of the complete text originally divided into a prologue and six books. Together the translators and editors have at last made available this classic work and have adorned it with notes, comments, bibliographies and glossary. They have produced a work of great value to zoologists, especially the ornithologist and also to everyone interested in the history of science and in medieval art and letters.
