The Cost of Reform John F. Jones, Asfaw Kumssa, 2000 This book is about the social impact of reform in the transitional economies of Europe Asia and Africa Whatever the advantages of adopting a market orientation and there are many the countries which have taken this road have had a high price to pay If one were to ask a Siberian miner or a Ukrainian woman selling vegetables in a village market whether the switch from socialism to capitalism was worth the rewards the question would likely evoke complaints about months of unpaid wages or persistent poverty The disappearance of the iron rice bowl in China draws praise from the neoclassic economist looking on from the outside but for the displaced worker going from city to city in search of employment the reaction will not be so enthusiastic In the move from central planning to a market economy there have been winners and losers The winners are those in a position to use the changing economic circumstances to their advantage and those having

access to the goods and services of the market But there are also among the poor and vulnerable groups consistent losers in the shuffling of opportunities rewards and costs The problems of people caught in economic reform are acute whether the emerging economies are shaped by sudden revolution from within as in Eastern Europe and Mongolia or by international pressure from outside frequently at the urging of the World Bank and the International Monetary Fund IMF as in some African countries or by the gradualism of socialist market systems like China Vietnam or Laos The social consequences of transition are significant and they form the principal concern and focus of this volume Its contributors both authors and editors recognize globalization and the technological revolution already in place and acknowledge the necessity for national economies to take advantage of the new freedoms and opportunities which the twenty first century heralds But while endorsing the efforts of countries to liberalize to build their markets and share the benefits of a world economy the book's various authors are primarily concerned with the socioeconomic consequences of transition on the lives of people The country case studies they present examine that impact

Neoliberalism, Civil Society and Security in Africa Pádraig Risteard Carmody, 2007-10-17 Free market policies have been in operation across Africa for the past twenty five years yet they have failed to reverse deepening poverty on the continent This book explores why such policies continue to be implemented despite their failure and the ways in which they have been reinvented by socialization depoliticization regionalization and securitization The impacts of these policies on security are traced through case studies of Ethiopia Zimbabwe and South Africa and ways to transcend neoliberalism on the continent are also explored *Zimbabwe Human Development Report, 1998* Brian Raftopoulos, 1998

Social Security and Social Protection in Botswana Dolly Ntseane, Kholisani Solo, 2007 *Women Without Borders* V. N. Muzvidziwa, 2005 In the face of a declining and collapsing national economy this book presents the story of enterprising and entrepreneurial Zimbabwean women operating as informal cross border traders in the SADC region The women are struggling against economic wants and deprivation and devising their own initiatives to defeat poverty The study relates their hopes perceptions and strategies for managing the structural constraints at micro and macro levels that at once make their activities necessary and simultaneously impose limitations on them *Harnessing Technologies for Sustainable Development* Bruce Ross-Larson, 2002 *Income, Public Social Services, and Capability Development* Rizwana Siddiqui, 2008

Social Change and Development, 1993 *Private and Public Sectors* Karl Wohlmuth, 2004 The African Development Perspectives Yearbook series fills a gap in the literature on Africa's development problems Experts from African institutions and regional organisations from international organisations from universities and research institutions from governmental and non governmental organisations and from the donor community analyse issues and report on problems and solutions on new policies programmes projections and visions and on new and ongoing projects in and for Africa Various levels of action that are relevant for Africa's development are considered in this Yearbook the international community in its relation to Africa interregional and national issues of Africa's development but

also local projects and local development achievements are documented Africa's development perspectives are therefore analysed and commented from the global to the local space by presenting analytical surveys and policy statements declarations and programmes of international regional national and voluntary organisations It is also the purpose of the African Development Perspectives Yearbook to establish a news and information network a forum for international communication on Africa's development perspectives This tenth volume presents analyses policy oriented papers development projections and proposals for reforms with regard to the role of public and private sectors in Africa The balance between private and public sector development in Africa is challenging due to a rapidly changing international environment in the era of globalisation It discusses the role of the private sector the functions of the private sector institutions the state of the privatisation programmes and the importance of a strengthening of public policies public infrastructures and public institutions in Africa
