Myths, Symbols and Legends of Solar System Bodies Rachel Alexander, 2014-11-04 This book is an amateur astronomer's guide to the mythology and symbolism associated with the celestial bodies in the Solar

System and even includes some of the legendary tales of people who had or have a connection with these objects It explores different cultures for example the Greco Roman and the Norse and different times and how stories were used to explain the worlds they saw above them You d be amazed how much of our world today reflects the myths and stories of these cultures Most amateur astronomers are familiar with the various Solar System objects but they will be only peripherally aware of what ancient cultures thought of these other worlds In fact the mythology of the planets challenges many twenty first century concepts and beliefs There are other books available on astromythology but this one focuses mostly on our own Solar System as opposed to the constellations and deep sky objects Alexander offers a new angle on timeless subjects and is exciting informative and dramatic as well as surprisingly relevant to everyday life Find out for yourself how our modern world is steeped in the bygone worlds of yesteryear Animals and the Human Imagination Aaron S. Gross, Anne Vallely, 2012-04-24 Human beings have long imagined their subjectivity ethics and ancestry with and through animals yet not until the mid twentieth century did contemporary thought reflect critically on animals significance in human self conception Thinkers such as French philosopher Jacques Derrida South African novelist J M Coetzee and American theorist Donna Haraway have initiated rigorous inquiries into the question of the animal now blossoming in a number of directions It is no longer strange to say that if animals did not exist we would have to invent them This interdisciplinary and cross cultural collection reflects the growth of animal studies as an independent field and the rise of animality as a critical lens through which to analyze society and culture on a par with race and gender Essays consider the role of animals in the human imagination and the imagination of the human the worldviews of indigenous peoples animal human mythology in early modern China and political uses of the animal in postcolonial India They engage with the theoretical underpinnings of the animal protection movement representations of animals in children s literature depictions of animals in contemporary art and the philosophical positioning of the animal from Aristotle to Derrida The strength of this companion lies in its timeliness and contextual diversity which makes it essential reading for students and researchers while further developing the parameters of the discipline **War and Peace with the Beasts** Brian Griffith, 2020-09-01 The animals that one culture likes are often hated in the next and it seems that the animals themselves know it well Basically one culture s animal partner is often another culture s nightmare from hell Naturally I wonder how relations between people and animals got to be so different around the world How did it happen that some cultures treat bats snakes wolves or ravens as embodiments of evil while other people treat the same animals with affection or even reverence Our wars with the animals go way back Beyond the light cast by our prehistoric campfires the eyes glowing in the night seemed to represent a great hostile force As we began to cultivate crops and husband a few favoured animals we generally regarded other creatures as threats to our chosen few Using the logic of war we sought to maximize the populations of certain creatures and the destruction of others In the past that war effort was our great crusade for the advancement of civilization as we knew it The war had a frontier a front line and an ongoing battle on

the home front Expanding outward from our various cradles of civilization we progressively tamed the forests and grasslands converting them to monocrop plantations or pastures Then we had to defend our monocrops from encroaching weeds insects and wild animals In this immediately engaging story and fact filled page turner of a book Brian Griffith looks at the range of ways we relate to animals and the stories we tell about them He asks how we choose whether buddyhood fearful respect businesslike predation or genocidal war is the most appropriate response to each species we meet He watches how our treatment of inferior beings affects our treatment of inferior people and traces some of the chain reactions we unleash when we try to weed out species we don t like Without much hope of making animals fit my personal preferences he writes I wonder how good our relations can get
