Women And Their Environment:

Women and the Environment Irwin Altman, Arza Churchman, 2013-06-29 This thirteenth volume in the series addresses an increasingly salient worldwide research design and policy issue women and physical environments We live in an era of worldwide social change Some nation states are fracturing or disintegrating migrations are resulting from political upheavals and economic opportunities some ethnic and national animosities are resurfacing and global and national economic systems are under stress Furthermore the variability of interpersonal and familial forms is increasing and cultural subgroups minorities women the physically challenged gays and lesbians are vigorously demanding their rights in societies and are becoming significant economic and political forces Although these social system changes affect many people their impact on women is especially salient Women are at the center of most forms of family life Whether in traditional or contemporary cultures women's roles in child rearing home management and community relations have and will continue to be central regardless of emerging and changing family structures And because of necessity and opportunity women are increasingly engaged in paid work in and outside the home women in most cultures have historically always worked but often not for pay Their influence in cultures and societies is also mounting in the social political and economic spheres In technological societies women are playing higher level roles though still in small numbers in economic and policy domains This trend is likely to accelerate in the twenty first century

Women, the Environment and Sustainable Development Rosi Braidotti, International Research and Training Institute for the Advancement of Women, 1994 There is a widespread perception that the development process is in a state of multiple crisis While the notion of sustainable development is supposed to address adequately its environmental dimensions there is still no agreed framework relating women to this new perspective This book is an attempt to present and disentangle the various positions put forward by major actors and to clarify the political and theoretical issues that are at stake in the debates on women the environment and sustainable development Among the current critiques of the western model of development which the authors review are the feminist analysis of Science itself and the power relations inherent in the production of knowledge Women Environment and Development WED Alternative Development Environmental Reformism and Deep Ecology Social Ecology and Ecofeminism In traversing this important landscape of ideas they show how they criticise the dominant developmental model at the various levels of epistemology theory and policy The authors also go further and put forward their own ideas as to the basic elements they consider necessary in constructing a paradigmatic shift emphasising such values as holism mutuality justice autonomy self reliance sustainability and peace This unique work is a signally useful contribution to clarifying thinking on a topic with immense implications for all women Publisher's description

Earthcare Carolyn Merchant, 2014-02-04 Written by one of the leading thinkers in environmentalism Earthcare brings together Merchant's existing work on the topic of women and the environment as well as updated and new essays Earthcare looks at age old historical associations of women with nature

beginning with Eve and continuing through to environmental activists of today women's commitment to environmental conservation and the problematic assumptions of women as caregivers and men as dominating nature *Women and the Environment* United States. Environmental Protection Agency. Office of Public Awareness, 1977 **Women and the Environment** United Nations Environment Programme, 2004 This publication which includes many short case studies and a bibliography focuses on gender related aspects of land water and biodiversity conservation and management and is intended to inspire the environmental and sustainable development community to better understand the importance of gender and to integrate a gender perspective across all of its work Topics covered include prevention of desertification in China and Brazil reduction of water pollution in post Chernobyl Ukraine and drought prevention in the Aral Sea region Uzbekistan and Kazakhstan Women and the Environment, 1978 **Hunger for the Wild** Michael L. Johnson, 2007 Americans have had an enduring yet ambivalent obsession with the West as both a place and a state of mind Michael L. Johnson considers how that obsession originated how it has determined attitudes toward and activities in the West and how it has changed over the centuries *The No-nonsense Guide to Women's Rights* Nikki Van der Gaag, 2004 How much how much has life really changed for women over the last decade Has the women's movement affected women all over the world Has it changed women's relationships with men Nikki van der Gaag answers these questions with hard sometimes disturbing evidence Many women have made huge leaps forward in legal rights political representation employment education and health The rhetoric of gender equality slips easily off the tongues of politicians But beneath the surface the statistics are shocking And men have changed very little Vivid testimonies from around the world explain why especially in this post feminist age women's rights are still very much an issue for men and women alike **Irish Economist (The)**, 1920 **Our monthly, for school & home**, 1904 *Women's Employment*, 1929 **Women and Missions**, 1924 **Women and the Environment** Annabel Rodda, 1991 *Report*, 1930 **Reports** Great Britain. Industrial Health Research Board, 1929 The Canadian Magazine, 1913 The Psychology of Childhood Edgar James Swift, 1930 **The New Age**, 1914 **The Women of Indonesia** Indonesia. Departemen Penerangan, 1990 **Canadian Magazine**, 1913
