Written In Stone The Multiple Dimensions Of Lithic Analysis:

Written in Stone P. Nick Kardulias, Richard W. Yerkes, 2003-01-01 Written in Stone The Multiple Dimensions of Lithic Analysis demonstrates the vitality of contemporary lithics analysis by examining material from a variety of geographical locations This edited collection is primarily concerned with the link between craft production and social complexity the nature of trade and the delineation of settlement patterns and manipulation of landscape While deconstructing the present to reconstruct the past each chapter incorporates a technological dimension shaped by the type of analysis utilized Methods include microwear analysis which adds significant understanding of stone tool function to the identification of obsidian sources which illustrates the potential of lithic provenance studies for reconstructing trade This book verifies and expands on the notion that lithics play an integral role in our understanding of past societies at all levels of complexity from Paleolithic hunter gatherers to archaic states *Lithic Technologies in Sedentary Societies* Rachel A. Horowitz, Grant S. McCall, 2019-06-21 Lithic Technologies in Sedentary Societies examines lithic technology from ancient societies in Mesoamerica the Near East South Asia and North America showcasing the important contributions in depth lithic analysis can make to the study of sedentary societies around the world Using cutting edge analytical techniques these case studies address difficult anthropological questions concerning economic social and political issues as well as global trends in lithic production Lithic analysis focused on sedentary societies especially in places like Mesoamerica has previously been neglected mostly because of the high frequency of informal tools but such bias limits the ways in which both lithic production and economic organization are investigated Bringing the importance of studying such technologies to the fore and emphasizing the vital anthropological questions that lithics can answer Lithic Technologies in Sedentary Societies is a valuable resource for scholars and students of lithic technology and sedentary complex societies Contributors Fumi Arakawa Mary A Davis James Enloe Dan Healan Francesca Manclossi Theodore Marks Jayur Madhusudan Mehta Jason S R Paling Steve Rosen John Whittaker *Archaeological Approaches to Technology* Heather Margaret-Louise Miller, 2017-03-02 This book is designed for upper division undergraduate and graduate level archaeology students taking courses in ancient technologies archaeological craft production material culture the history of technology archaeometry and field methods This text can also serve as a general introduction and a reference for archaeologists material culture specialists in socio cultural disciplines and engineers scientists interested in the backgrounds and histories of their disciplines The study of ancient technologies that is the ways in which objects and materials were made and used can reveal insights into economic social political and ritual realms of the past This book summarizes the current state of ancient technology studies by emphasizing methodologies some major technologies and the questions and issues that drive archaeologists in their consideration of these technologies It shows the ways that technology studies can be used by archaeologists working anywhere on any type of society and it embraces an orientation toward the practical not the philosophical It compares the range of pre industrial

Chert Availability and Prehistoric Exploitation in the Near East Christophe Delage, 2007 This collective volume offers a variety of perspectives which come together to offer a comprehensive picture of chert procurement and exploitation in Prehistory in the Near East and the Levant The contributions include geoarchaeological and geological surveys mapping chert sources and quarry sites placed in the broader context of lithic resources and exploitation in the region case studies of specific sites and the characterization of chert samples and archaeological finds through macroscopic mineralogical and petrographic analysis They also offer studies of the raw material selection and chaîne opératoire involved in lithic production using siliceous rocks offering insights into the development of lithic technology and tool use in the region from the earliest evidence through to the role of flint and chert in the technological and economic systems of Neolithic farming communities

Political Economies of the Aegean Bronze Age Daniel J. Pullen, 2010 This volume brings together an international group of researchers to address how Mycenaean and Minoan states controlled the economy The contributions originally delivered at the 2007 Langford Conference at the Florida State University examine the political economies of state and pre state entities within the Aegean Bronze Age including the issues of centralization and multiple scales of production distribution and consumption within a polity importance of extraregional trade craft specialization the role of non elite institutions and the political economy before the emergence of the palaces The contributors address these issues from an explicitly comparative perspective both within and across Minoan and Mycenaean contexts The conclusions reached in this volume shed new light on the essential differences between and among Minoan and Mycenaean states through their political economies

Side-by-side Survey Susan E. Alcock, John F. Cherry, 2004 Twenty years ago John Cherry looked forward to the day when archaeological survey projects working around the Mediterranean region the Frogs round the pond would begin to compare and synthesize the information they had collected He anticipated researchers tackling big questions of inter regional scope in new and interesting ways working at a geographical scale considerably larger than that of the individual survey Was his optimism misplaced Despite the extraordinary growth of interest in field survey projects and regional analysis and despite the developments in survey methodology that have been discussed and implemented in the past two decades few scholars have attempted to use survey data in a comparative mode and to answer the broad scale questions confronting social historians In this volume which is the outcome of an advanced Workshop held at the University of Michigan in 2002 a number of prominent archaeologists return to the question of comparability They discuss the potential benefits of working in a comparative format with evidence from many different Mediterranean survey projects and consider the practical problems that present roadblocks to achieving that objective From mapping and manuring to human settlement and demography environment and culture each addresses

different questions often with quite different approaches together they offer a range of perspectives on how to put surveys side by side Contributors include Susan E Alcock John Cherry Jack L Davis Peter Attema Martijn van Leusen James C Wright Robin Osborne David Mattingly T J Wilkinson and Richard E Blanton **ANTIQUITY** MARTIN CARVER,2003 *Asian Perspectives* ,2008 **Thesprotia Expedition I** Björn Forsén,2009 Mesoamerican Lithic Technology Kenn Hirth,2003 Any overview of prehispanic society in the Americas would identify its obsidian core blade production as a unique and highly inventive technology Normally termed prismatic blades these long parallel sided flakes are among the sharpest cutting tools ever produced by humans Their standardized form permitted interchangeable use and such blades became the cutting tool of choice throughout Mesoamerica between 600 800 B C Because considerable production skill is required increased demand may have stimulated the appearance of craft specialists who played an integral role in Mesoamerican society Some investigators have argued that control over obsidian also had a significant effect on the development and organization of chiefdom and state level societies While researchers have long recognized the potential of obsidian studies recent work has focused primarily on compositional analysis to reconstruct trade and distribution networks Study of blade production has received much less attention and many aspects of this highly evolved craft are still lost This volume seeks to identify current research questions in Mesoamerican lithic technology and to demonstrate that replication studies coupled with experimental research design are valuable analytical approaches to such questions
