

CHAPTER 15

THE RULE OF EXPERTS

ROGER KOPPL

INTRODUCTION

Anyone who is paid for his or her opinion is an expert. Experts “fail” when they produce incorrect opinions. Experts may threaten individual autonomy if they have power. A psychologist with the legal authority to commit persons to an institution is an expert with power. The risk of expert failure is greater when experts enjoy an epistemic monopoly and when they choose for others rather than merely advising them. The “rule of experts” exists when experts have an epistemic monopoly and choose for others. Even when the power of experts is limited or compromised, however, they may fail, and they may act in ways tending to reduce the autonomy of others.

Many writers have recognized problems with *experts*, however the term is defined. Some have found problems with psychologists (Szasz 1960), physicians (Berger and Luckmann 1966, 87–88), medical researchers (Berger, Matthews, and Grosch 2008; Ioannidis 2005), economists (Levy and Peart 2006), forensic scientists (Cole 2005; Pyrek 2007), expert witnesses in civil court (Huber 1993), and eugenicists (Peart and Levy 2005). Some have recognized problems with experts in general, such as a link between expertise and power (Foucault 1980) or a tension between expertise and democracy (Merton 1976; Habermas 1987; Turner 2001). It may still be true, however, that experts and expertise enjoy high prestige with most intellectuals and much of the general public. While expertise seems to be a necessary consequence of the division of labor, the existence of experts seems to create a problem of power.

The problem of experts is intractable, because the division of labor creates a division of knowledge, which entails specialized knowledge. Typically, though not necessarily, the expert is paid for his or her opinion because the expert has specialized knowledge. Typically, therefore, demand for the expert’s opinion will dissipate if his or her specialized knowledge becomes common knowledge or is no longer valued by others. It seems, then, that we will always have experts and that most experts will receive a rent on their expertise.
