Hogstel,Nancy Carol Sayner,1986 **The Art and Science of Effective and Impactful COMMUNICATION** Karminder Ghuman, PhD,2024-08-10 Communication makes a big difference

A deeper understanding of this domain can enable individuals and professionals to achieve their intended objectives. Imparting education and corporate training in the field of communication for more than 25 years has been a transformational experience. Grappling with the realities of communication and parallel to that conducting informal research regarding various communication principles has been an exhilarating experience. I believe that for what all I have gained while having a very interactive interface with the world of communication now is the right time to repay by assimilating all my experiences in the form of a very comprehensive book in which the concepts and principles of communication are narrated in a lucid and non-textual manner. The objective of writing this book is to fulfill the need of individuals who need focused literature to develop their communication not only from an operational angle like writing or making an oral presentation but also as communication happens typically every second in formal and informal settings of the personal and working life of an individual. An attempt has been made to have an application bias instead of a theoretical one.

Do your thoughts, expressions, and actions have hidden codes and messages that dictate your reality? Does the universe receive these messages and utilize them to create your experiences in life? In this timely book, Dr. Greenberg shares her insight on how you can master the universe's language and begin to co-create with universal energy. In this epic time of humanity's existence and as the inquisition continues to mount regarding the Ascension process and the year 2012, Mastering the language of the Universe will serve you as a key to unlocking your divine potential and raise you to a mastery level of Co-creator with the universe.

Children in the Films of Steven Spielberg Adrian Schober, Debbie Olson, 2016-04-13 To say that children matter in Steven Spielberg's films is an understatement. Think of the possessed Stevie in *Something Evil*, TV Baby Langston in *The Sugarland Express*, the alien-abducted Barry in *Close Encounters*, Elliott and his unearthly alter ego in *E.T.*, the war-damaged Jim in *Empire of the Sun*, the little girl in the red coat in *Schindler's List*, the mecha child in *A.I.*, the kidnapped boy in *Minority Report*, and the eponymous boy hero of *The Adventures of Tintin*. There are many other instances across his oeuvre. Contradicting his reputation as a purveyor of popcorn entertainment, Spielberg's vision of children's childhood is complex. Discerning critics have begun to note its darker underpinnings, increasingly fraught with tensions, conflicts, and anxieties. But while childhood is Spielberg's principal source of inspiration, the topic has never been the focus of a dedicated collection of essays. The essays in

Children in the Films of Steven Spielberg therefore seek to address childhood in the full spectrum of Spielberg's cinema. Fittingly, the scholars represented here draw on a range of theoretical frameworks and disciplines: cinema studies, literary studies, audience reception, critical race theory, psychoanalysis, sociology, and more. This is an important book for not only scholars but teachers and students of Spielberg's work and for any serious fan of the director and his career. *The New Ireland Review*, 1903
