Using Our Language David Hubert Patton, 1953 **Our Language**, 1894 **Our Language** Frederik Atherton Fernald, 1894 **Bringing Our Languages Home** Leanne Hinton, 2013-03-01

Thirteen personal accounts of endangered language preservation plus a how to guide for parents looking to do the same in their own home Throughout the world individuals in the intimacy of their homes innovate improvise and struggle daily to pass on endangered languages to their children Elaina Albers of Northern California holds a tape recorder up to her womb so her baby can hear old songs in Karuk The Baldwin family of Montana put labels all over their house marked with the Miami words for common objects and activities to keep the vocabulary present and fresh In Massachusetts at the birth of their first daughter Jesse Little Doe Baird and her husband convince the obstetrician and nurses to remain silent so that the first words their baby hears in this world are Wampanoag Thirteen autobiographical accounts of language revitalization ranging from Irish Gaelic to Mohawk Kawaiisu to Maori are brought together by Leanne Hinton professor emerita of linguistics at UC Berkeley who for decades has been leading efforts to preserve the rich linguistic heritage of the world Those seeking to save their language will find unique instruction in these pages everyone who admires the human spirit will find abundant inspiration Languages featured Anishinaabemowin Hawaiian Irish Karuk Kawaiisu Kypriaka Maori Miami Mohawk Scottish Gaelic Wampanoag Warlpiri Yuchi Practical and down to earth philosophical and spiritual Bringing Our Languages Home describes the challenges and joys of learning and passing on your language It gives good detailed advice Fantastic I hope millions will read it Tove Skutnabb Kangas bo Akademi University Finland emerita This rare collection by scholar activist Leanne Hinton brings forward deeply affecting accounts of families determined to sustain their languages amidst a sea of dominant language pressures The stories could only be told by those who have experienced the joys and challenges such an undertaking demands Drawing lessons from these accounts Hinton leaves readers with a wealth of language planning strategies This powerful volume will long serve as a seminal resource for families scholars and language planners around the world Teresa L McCarty George F Kneller Chair in Education and Anthropology University of California Los Angeles *Shadows of Syntax* Jared Warren, 2020 What is the source of logical and mathematical truth This volume revitalizes conventionalism as an answer to this question Conventionalism takes logical and mathematical truth to have their source in linguistic conventions This was an extremely popular view in the early 20th century but it was never worked out in detail and is now almost universally rejected in mainstream philosophical circles In *Shadows of Syntax* Jared Warren offers the first book length treatment and defense of a combined conventionalist theory of logic and mathematics He argues that our conventions in the form of syntactic rules of language use are perfectly suited to explain the truth necessity and a priority of logical and mathematical claims In Part I Warren explains exactly what conventionalism amounts to and what linguistic conventions are Part II develops an unrestricted inferentialist theory of the meanings of logical constants that leads to logical conventionalism

This conventionalist theory is elaborated in discussions of logical pluralism the epistemology of logic and of the influential objections that led to the historical demise of conventionalism Part III aims to extend conventionalism from logic to mathematics Unlike logic mathematics involves both ontological commitments and a rich notion of truth that cannot be generated by any algorithmic process To address these issues Warren develops conventionalist friendly but independently plausible theories of both metaontology and mathematical truth Finally Part IV steps back to address big picture worries and meta worries about conventionalism This book develops and defends a unified theory of logic and mathematics according to which logical and mathematical truths are reflections of our linguistic rules mere shadows of syntax
