Mythologizing the Vietnam War Jennifer Good,Brigitte Lardinois,Paul Lowe,2014-10-16 The Vietnam War is evolving from contemporary memory into history Fifty years on it still serves as a benchmark in the history of war reporting and in the representation of conflict in popular culture and historical memory However as contemporary culture tries to come to terms with the events and their political psychological and cultural implications the real Vietnam War has been appropriated and changed into a set of mythologies which implicate American and Vietnamese national identities specifically and ideas of modern conflict more broadly particularly in shaping the mediation of the twenty first century War on Terror This collection of interdisciplinary critical essays explores the cultural legacies of the US involvement in South East Asia considering this process of mythologising through the lenses of visual media and tracing the war s evolution from contemporary reportage to subsequent interpretation and consumption It reassesses the role of visual media in covering and remembering the war its memorialisation mediation and memory The origin of this collection of essays was an international conference titled Considering Vietnam held at the Imperial War Museum London in February 2012 co organised by the museum and the University of the Arts London Photography and the Archive Research Centre PARC **United States Embargo of Trade with South Vietnam and Cambodia** United States. movie This is Killing for Show Since the Vietnam War the way we see conflict through film photographs and pixels has had a powerful impact on the political fortunes of the campaign and the way that war has been conducted In this fully illustrated and passionately argued account of war imagery Julian Stallabrass tells the story of post war conflict how it was recorded and remembered through its iconic photography The relationship between war and photograph is constantly in transition forming new perspectives provoking new challenges what is allowed to be seen Does an image have the power to change political opinion How are images used to wage war Stallabrass shows how photographs have become a vital weapon in the modern war as propaganda from close quarters fighting to the drone s electronic vision as well as a witness to the barbarity of events such as the My Lai massacre the violent suppression of insurgent Fallujah or the atrocities in Abu Ghraib Through these accounts Stallabrass maps a comprehensive theoretical re evaluation of the relationship between war politics and visual culture Killing for Show offers 190 photographs encompassing photojournalism artists images photographs by soldiers and amateurs and drones A comprehensive comparison of the role of photography in the Vietnam and Iraq Wars An explanation of the waning power of iconic images in collective memory An analysis of the failure of military PR and the public display of killing A focus on what can and cannot be seen photographed and published An exploration of the power and limits of amateur photography Arguments about how violent images act on democracy This full color book is an essential volume in the history of warfare and photography
