To attempt such reasoning, it will at first be introduced an own definition of literature. The main focus will be put on rather psychological and metaphysical approaches to literature from Rita Felski, Daniel Albright, and Derek Attridge. Their approaches to literature will be discussed to be able to deduce an own definition of literature that is appropriate to answer this paper's main question of what the potential of literature and also its value can be in the 21st century. To do this, the Felski's four modes of textual engagement: recognition, enchantment, knowledge, and shock will be taken a closer look at.
