Psychological Selection and Optimal Experience Across Cultures Antonella Delle Fave, Fausto Massimini, Marta Bassi, 2011-02-02 What does Western science know about the relationship between individual well being and cultural trends What can learn from other cultural traditions What do the recent advancements in positive psychology teach us on this issue particularly the eudaimonic framework which emphasizes the connections between personal well being and social welfare People grow and live in cultures that deeply influence their values aspirations and behaviors However individuals in their turn play an active role in building their own goals growth trajectories and social roles at the same time influencing culture trends This process defined psychological selection is related to the individual pursuit of well being People preferentially select and cultivate in their lives activities interests and relationships associated with optimal experience a state of deep engagement concentration and enjoyment Several cross cultural studies confirmed the positive and rewarding features of optimal experience Based on these evidences this book offers a new perspective in the study of human behavior Highlighting the interplay between individual and cultural growth trajectories it conveys a core message educating people to enjoy engagement and involvement in activities that can be relevant and meaningful for social welfare is a premise to foster the harmonious development of human communities and the peaceful cohabitation of cultures

Novel Techniques for Investigating Recharge to the Memphis Aquifer Randy Gentry, 2006 This study of recharge mechanisms to the Memphis aquifer in Shelby County Tennessee sought to develop better tools to enhance MLG W s capabilities in managing water resources of the Memphis aquifer and improve sourcewater protection The specific objective of the study was to develop a better understanding of the magnitude and impact of recharge through windows in the upper Claiborne confining layer The study was successful in describing in more detail the flow behavior and unique age distribution characterization at this shallow aquifer The combined tools used to study the window site have resulted in a new proposed hydrostratigraphic conceptual model for the site explaining the most probable genesis of the window as well as groundwater flow patterns in and around the window Includes CD
