Yarn Texturing Technology J. W. S. Hearle, L. Hollick, D K Wilson, 2001-10-09 Texturing is increasingly important in textile production not only in yarns for weaving and knitting fashion products but also for carpets furnishing fabrics and a variety of technical textiles This book covers all the major techniques including twist texturing jet screen texturing false twist process BCF processes and air jet texturing in detail Combining a comprehensive review of the physics and chemistry of texturing with a thorough illustrated description of current practice this book is invaluable for yarn and fabric manufacturers textile scientists and students on textile science and technology courses Synthetic Filament Yarn Ali Demir, Hassan M. Behery, 1997 *Advances in Yarn Spinning Technology* C A Lawrence, 2010-09-27 This book provides an invaluable single source of information on the advances in yarn spinning technologies Advanced spinning systems are described and comparisons are made of the properties of the yarns produced and resultant finished products with those from conventional systems Part one provides an introduction to yarn fibre spinning and structure Chapters discuss the principles of ring spinning and open end spinning of yarns Yarn structure and properties from different spinning techniques and yarn structural requirements for knitted and woven fabrics are also examined Part two covers advances in particular yarn spinning technologies Topics range from siro spinning to compact spinning technology and air jet spinning Final chapters explore how to minimise fibre damage which occur during spinning and the use of spin finishes for textiles With its distinguished editor and array of international contributors *Advances in yarn spinning technology* is an important text for spinners yarn manufacturers and fabric producers as well as researchers technicians engineers and technologists in this sector of the textile industry Documents advances in spinning technologies and presents comparisons between systems Assesses particular textile spinning technologies with specific chapters focusing on siro compact rotor friction and air jet spinning Reviews measures to minimise fibre damage caused by spinning are investigated with specific relevance to rotor and friction spinning Textured Yarn Technology: Production, properties, and processing Monsanto Company. Textiles Division, 1967 **Textile Technology Digest** ,2002 *False Twist Textured Yarns* C Atkinson, 2012-03-15 A false twist textured yarn is a continuous filament yarn that has been processed to introduce crimps coils loops and other fine distortions along the yarn's length These distortions give synthetic yarns such as nylon polyester and polypropylene improved properties such as stretch bulk improved thermal insulation and an appearance similar to natural fibres This important book summarises the key principles technologies and process issues in the manufacture of high quality false twist textured yarns After an introductory chapter on the development of textured yarns the book reviews yarn texturing machine designs and twist application methods including air jet mingling and machine variants for draw textured speciality yarns It also reviews common process performance and quality problems and how they can be resolved as well process control quality assurance and costs The final chapters look at applications of false twist textured nylon polyester and polypropylene yarns as well as the

future of false twist texturing Based on the author s extensive experience in the textile industry False twist textured yarns is a standard reference on the key technologies and process issues involved in the manufacture of high quality false twist textured yarns Discusses the development of textured yarns the basic principles of texturing and the process of false twist texturing Summarises the key principles technologies and process issues in the manufacture of high quality false twist textured yarns Chapters include texturing machine design applications of textured yarns and the future opportunities for false twist texturing *Handbook of Fibre Rope Technology* H A McKenna, J. W. S. Hearle, N O'Hear, 2004-04-22 Annotation Fibre rope has undergone dramatic technological changes over the last few decades with such advances as the development of synthetic fibres and modern types of rope construction This major handbook takes a comprehensive look at rope making materials and structures properties and mechanics It covers rope production focusing on laid strand braided low twist and parallel yarn ropes and rope terminations Rope testing is examined in depth as well as the key issues surrounding rope retirement Case studies from a variety of environments are studied This is an essential reference for everyone involved in the design selection use inspection and testing of fibre rope CONTENTS Introduction to fibre ropes Rope making materials Rope structures Properties of rope Rope mechanics Rope production Terminations Use of rope Inspection and retirement Testing Consumption markets and liability Case studies **Written Comments on Certain Tariff and Trade Bills**, 1985
