Recent Trends in Civil Engineering K. K. Pathak, J. M. S. J. Bandara, Ramakant Agrawal, 2020-09-27 This book presents the selected peer reviewed proceedings of the International Conference on Recent Trends and Innovations in Civil Engineering ICRTICE 2019 The volume focuses on latest research and advances in the field of civil engineering and materials science such as design and development of new environmental materials performance testing and verification of smart materials performance analysis and simulation of steel structures design and performance optimization of concrete structures and building materials analysis The book also covers studies in geotechnical engineering hydraulic engineering road and bridge engineering building services design engineering management water resource engineering and renewable energy The contents of this book will be useful for students researchers and professionals working in civil engineering

RECENT TRENDS IN CHEMICAL SCIENCES AND ENVIRONMENTAL SCIENCE Dr. Azad Kumar, Dr. Rajesh Kumar Singh, Dr. Yashvant Rao, 2021-11-18 Our intention in publishing this book was to discuss and interpret all of the major issues in the chemical and environmental science disciplines because this book covers such a broad range of chemical and environmental science research area Rather we have selected the themes and challenges briefly defined them and demonstrated how they connect clarified the terminology and indicated where further research may be accessed We hope that the result is an excellent introduction to chemical and environmental science It is primarily aimed towards researchers in chemical science and related fields but it should be accessible to new researchers as well We have explored into more depth on issues that have received little attention elsewhere There are several useful sources for topics such as chemical science environmental science nanotechnology ionic liquids solid waste management photodegradation Nanomaterial adsorption of hazardous metals and conducting polymers However we attempted to provide up to current knowledge we are well aware that books may soon go out of date if they seek to provide too much detail so we concentrated on basic concepts that should not go out of fashion too quickly Our book differs somewhat from other texts in the chemical and environmental sciences in its concentration We have focused on ideas and theories because we feel that a solid grasp of them will be more useful in the long run than specifics of present systems services and approaches We ve also highlighted the dimension since we feel it s critical to understand where the discipline and its components originated from and why some things are the way they are This approach is based on the research with several references provided at the end of each chapter for convenience Our intention is that the content of this book will be sufficient to provide a fundamental knowledge of the entire field and that readers will refer to the references for more information and examples of the parts of which they are most interested The conclusion words and captions as well as the important references at the conclusion of each chapter are intended to present the main points in a factual way Carbon Footprint Analysis Matthew John Franchetti, Defne Apul, 2012-06-18 The negative impacts of carbon emissions from human activities continue to dramatically reshape the environmental political and social

landscape These impacts coupled with cap and trade schemes iterate the importance and need to properly measure and reduce greenhouse gas emissions Carbon Footprint Analysis Concepts Methods Implementation and Case Studies provides up to date technical information and practical guidance on measuring and reducing energy and GHG emissions Presenting a comprehensive framework for carbon management this book Provides definitions concepts benefits and background information regarding carbon footprint analyses Discusses the GHG accounting methods Outlines the general systems framework for conducting an audit Features four case studies in higher education service and manufacturing organizations The book includes detailed discussions of the concepts and explains how the different concepts fit together It supplies the necessary background as well as systematic tools and procedures for organizations to measure and reduce their carbon footprints and begin to adapt to a carbon constrained world *The Carbon Footprint of Everything* Mike

Berners-Lee,2022-04-26 I can t remember the last time I read a book that was more fascinating and useful and enjoyable Bill Bryson Reduce your carbon footprint and understand the issue with this up to date life guide for carbon conscious readers Kirkus Calculate your carbon footprint with an item by item breakdown Meet your company s carbon goals using the latest research Covid 19 and the carbon battle understand the new global supply chain *The Carbon Footprint of Everything* breaks items down by the amount of carbon they produce creating a calorie guide for the carbon conscious With engaging writing leading carbon expert Mike Berners Lee shares new carbon calculations based on recent research He considers the impact of the pandemic on the carbon battle especially the embattled global supply chain and adds items we didn t consider a decade ago like bitcoin and other cryptocurrencies Supported by solid research cross referenced with other expert sources illustrated with easy to follow charts and graphs and written with Berners Lee s trademark sense of humor *The Carbon Footprint of Everything* should be on everyone s bookshelf *The Carbon Footprint of Everything* is an extensively revised and updated edition of *How Bad Are Bananas* [The Environmental Impact of Sieben Linden Ecovillage](#) Andrea Bocco,Martina Gerace,Susanna Pollini,2019-01-10 The Open Access version of this book available at <https://www.taylorfrancis.com/books/9780367145644> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Environmental impact assessment is widely taught and researched but rarely covers both lifestyle and building construction in a town or neighbourhood This book provides a broad assessment of the environmental impact of the ecovillage Sieben Linden in Germany The ecovillage was founded in 1997 and has a population of over one hundred people This book shows how raising the awareness of individuals and adopting a consistent way of community living can be environmentally friendly This applies both to everyday practices and the way the houses in the ecovillage are built The tools used to measure the impact are Ecological Footprint and Carbon Footprint methodologies making use of indicators such as Primary Energy Intensity and Global Warming Potential Despite the difficulties encountered by using standardised methodologies these research tools provide an overall assessment and have allowed comparisons with selected similar cases and general values

from statistic sources This book will be of great use to professionals and scholars in the fields of environmental impact assessment particularly at the town district city level and of city and ecovillage management It will particularly appeal to those engaged in a Sustainable Development Goal 11 perspective as well as environmental policy makers at the local level
