Soft Computing Techniques in Knowledge-based Intelligent Engineering Systems L. C. Jain,1997-10-09

Presented are the theory and applications of soft computing paradigms including knowledge based techniques neural networks fuzzy systems and genetic algorithms in engineering system design The book contains 11 chapters The first four provide an introduction to to the knowledge based systems neural networks fuzzy systems and evolutionary computing techniques The last 7 chapters include the applications of knowledge based systems in engineering productivity quality and technology transfer knowledge based systems in real time applications logic grammar in electronic circuit representation applications of neural networks evolution of neural structure based on cellular automata application of ART and ARTMAP in self organising learning recognition and production and applications of fuzzy systems

Software Prototyping in Data and Knowledge Engineering G. Guida,G. Lamperti,Marina Zanella,2013-03-07 This monograph describes an innovative prototyping framework for data and knowledge intensive systems The proposed approach will prove especially useful for advanced and research oriented projects that aim to develop a traditional database perspective into fully fledged advanced database approaches and knowledge engineering technologies The book is organised in two parts The first part comprising chapters 1 to 4 provides an introduction to the concept of prototyping to database and knowledge based technologies and to the main issues involved in the integration of data and knowledge engineering The second part comprising chapters 5 to 12 illustrates the proposed approach in technical detail Audience This volume will be of interest to researchers in the field of databases and knowledge engineering in general and for software designers and knowledge engineers who aim to expand their expertise in data and knowledge intensive systems

Fuzzy Cognitive Maps Michael Glykas,2010-07-07 This important edited volume is the first such book ever published on fuzzy cognitive maps FCMs Professor Michael Glykas has done an exceptional job in bringing together and editing its seventeen chapters The volume appears nearly a quarter century after my original article Fuzzy Cognitive Maps appeared in the International Journal of Man Machine Studies in 1986 The volume accordingly reflects many years of research effort in the development of FCM theory and applications and portends many more decades of FCM research and applications to come FCMs are fuzzy feedback models of causality They combine aspects of fuzzy logic neural networks semantic networks expert systems and nonlinear dynamical systems That rich structure endows FCMs with their own complexity and lets them apply to a wide range of problems in engineering and in the soft and hard sciences Their partial edge connections allow a user to directly represent causality as a matter of degree and to learn new edge strengths from training data Their directed graph structure allows forward or what if inferencing FCM cycles or feedback paths allow for complex nonlinear dynamics Control of FCM nonlinear dynamics can in many cases let the user encode and decode concept patterns as fixed point attractors or limit cycles or perhaps as more exotic dynamical equilibria These global equilibrium patterns are often hidden in the nonlinear dynamics The user will not likely see these global

patterns by simply inspecting the local causal edges or nodes of large FCMs **Forging New Frontiers: Fuzzy Pioneers II** Masoud Nikravesh, Lofti A. Zadeh, 2007-10-30 The chapters of the book are evolved from presentations made by selected participants at the 2005 BISC International Special Event held at the University of California at Berkeley The papers include reports from the different front of soft computing in various industries and address the problems of different fields of research in fuzzy logic fuzzy set and soft computing The book provides a collection of forty four articles in two volumes

Knowledge Processing and Decision Making in Agent-Based Systems Lakhmi C Jain, Ngoc Thanh Nguyen, 2009-01-17 Knowledge processing and decision making in agent based systems constitute the key components of intelligent machines The contributions included in the book are Innovations in Knowledge Processing and Decision Making in Agent Based Systems Towards Real World HTN Planning Agents Mobile Agent Based System for Distributed Software Maintenance Software Agents in New Generation Networks Towards the Automation of Telecom Processes Multi agent Systems and Paraconsistent Knowledge An Agent based Negotiation Platform for Collaborative Decision Making in Construction Supply Chain An Event Driven Algorithm for Agents at the Web A Generic Mobile Agent Framework Toward Ambient Intelligence Developing Actionable Trading Strategies Agent Uncertainty Model and Quantum Mechanics Representation Agent Transportation Layer Adaptation System Software Agents to Enable Service Composition through Negotiation Advanced Technology Towards Developing Decentralized Autonomous Flexible Manufacturing Systems

Knowledge-Based Information Systems in Practice Jeffrey W. Tweedale, Lakhmi C. Jain, Junzo Watada, Robert J. Howlett, 2015-01-21 This book contains innovative research from leading researchers who presented their work at the 17th International Conference on Knowledge Based and Intelligent Information and Engineering Systems KES 2013 held in Kitakyushu Japan in September 2013 The conference provided a competitive field of 236 contributors from which 38 authors expanded their contributions and only 21 published A plethora of techniques and innovative applications are represented within this volume The chapters are organized using four themes These topics include data mining knowledge management advanced information processes and system modelling applications Each topic contains multiple contributions and many offer case studies or innovative examples Anyone that wants to work with information repositories or process knowledge should consider reading one or more chapters focused on their technique of choice They may also benefit from reading other chapters to assess if an alternative technique represents a more suitable approach This book will benefit anyone already working with Knowledge Based or Intelligent Information Systems however is suitable for students and researchers seeking to learn more about modern Artificial Intelligence techniques *Hybrid Intelligent Engineering Systems* L. C. Jain, R. K. Jain, 1997 This book on hybrid intelligent engineering systems is unique in the sense that it presents the integration of expert systems neural networks fuzzy systems genetic algorithms and chaos engineering It shows that these new techniques enhance the capabilities of one another A number of hybrid systems for solving engineering problems are presented

Intelligent Decision Support Systems in Agent-mediated Environments Gloria E. Phillips-Wren,L. C. Jain,2005 Research has shown that harassed decision makers in decision support technologies for real time and uncertain decision problems often ignore crucial information use inefficient strategies and generate fewer alternatives Examples of such problems are medical emergencies traffic flow and military applications Researchers are limited by a narrow understanding of the most effectual methods to support decision making in real time and stressful situations Intelligent software agents offer one approach to operationalizing a decision making support system in these circumstances by providing an environment that can adapt to speed and change Agent technology has been used to aid and automate complex problem solving such as brokering in electronic commerce and financial services An agent is a software package that carries out tasks for others autonomously whether the others are human users business processes workflows or applications *Forthcoming Books* Rose Arny,1998 **Soft Computing and Intelligent Systems Design** Fakhreddine O. Karray,Clarence W. De Silva,2004 Traditional artificial intelligence AI techniques are based around mathematical techniques of symbolic logic with programming in languages such as Prolog and LISP invented in the 1960s These are referred to as crisp techniques by the soft computing community The new wave of AI methods seeks inspiration from the world of biology and is being used to create numerous real world intelligent systems with the aid of soft computing tools These new methods are being increasingly taught at the upper end of the curriculum sometimes as an adjunct to traditional AI courses and sometimes as a replacement for them Where a more radical approach is taken and the course is being taught at an introductory level we have recently published Negnevitsky s book Karray and Silva will be suitable for the majority of courses which will be found at an advanced level Karray and de Silva cover the problem of control and intelligent systems design using soft computing techniques in an integrated manner They present both theory and applications including industrial applications and the book contains numerous worked examples problems and case studies Covering the state of the art in soft computing techniques the book gives the reader sufficient knowledge to tackle a wide range of complex systems for which traditional techniques are inadequate **Knowledge-based Software Engineering** Vadim Stefanuk,Kenji Kajiri,2004 JCKBSE aims to provide a forum for researchers and practitioners to discuss the latest developments in the areas of knowledge engineering and software engineering Particular emphasis is placed upon applying knowledge based methods to software engineering problems This volume is a collection of contributions of authors from 8 different countries The book covers a wide range of topics related to knowledge based or automated software engineering architecture of knowledge software and information systems requirement engineering domain analysis and modelling formal and semiformal specifications knowledge engineering for domain modelling data mining and knowledge discovery automating software design and synthesis object
