Modelling Water Flow in Unsaturated Porous Media Adam Szymkiewicz,2012-10-11 The book focuses on two issues related to mathematical and numerical modelling of flow in unsaturated porous media In the first part numerical solution of the governing equations is discussed with particular emphasis on the spatial discretization of highly nonlinear permeability coefficient The second part

deals with large scale flow in heterogeneous porous media of binary structure Upscaled models are developed and it is shown that the presence of material heterogeneities may give rise to additional non equilibrium terms in the governing equations or to hysteresis in the averaged constitutive relationships *Encyclopedia of Agrophysics* Jan Gliński, Józef Horabik, Jerzy Lipiec, 2011-06-07 This Encyclopedia of Agrophysics will provide up to date information on the physical properties and processes affecting the quality of the environment and plant production It will be a first up volume which will nicely complement the recently published Encyclopedia of Soil Science November 2007 which was published in the same series In a single authoritative volume a collection of about 250 informative articles and ca 400 glossary terms covering all aspects of agrophysics will be presented The authors will be renowned specialists in various aspects in agrophysics from a wide variety of countries Agrophysics is important both for research and practical use not only in agriculture but also in areas like environmental science land reclamation food processing etc Agrophysics is a relatively new interdisciplinary field closely related to Agrochemistry Agrobiolgy Agroclimatology and Agroecology Nowadays it has been fully accepted as an agricultural and environmental discipline As such this Encyclopedia volume will be an indispensable working tool for scientists and practitioners from different disciplines like agriculture soil science geosciences environmental science geography and engineering
