

A large solar panel array is shown in a desert landscape under a clear blue sky. In the foreground, a server rack is visible, containing several server units. The server rack is connected to a power source, likely the solar panels, as indicated by the red lines connecting the units. The overall scene suggests a sustainable energy solution for data centers.

Paykoc,Y. Yener,2012-12-06 Until very recently energy supply of the world has been treated as being nearly inexhaustible Nowadays about 90 percent of the energy used is obtained from non renewable resources oil natural gas coal and uranium These resources are being used up at an alarming rate To meet our demands we are now searching for new sources of energy One of these new sources of energy is solar energy which will assume increasing importance It is free but means must be developed to use it economically Research is actively under way to reduce the storage cost of this low intensity energy and for the design of economical systems The purpose of this Institute is to provide an international forum for the dissemination of information on solar energy utilization fundamentals and applications in industry This meeting is primarily a high level teaching activity The subject is treated in considerable depth by lecturers eminent in their field The other participants include scientists engineers and senior graduate students who themselves are involved in a similar research and who wish to learn more about current developments as well as scientists from other areas who are planning to research on solar energy The lectures are supplemented by informal discussions designed to encourage the free and critical exchange of ideas A limited number of contributions are also included This volume contains both basic and applied information contributed during the Institute The editors appreciate the cooperation of Martinus Nijhoff Publishers in making the proceedings widely available **Solar Energy Utilization** Zhigang Yang,1993 *Solar Energy Utilization* Tim Michels,Washington University (Saint Louis, Mo.),1976 **Solar Thermal Energy Utilization** University of New Mexico.
