*The Copycat Effect* Loren Coleman, 2004-09-14 VIOLENCE BEGETS VIOLENCE BEGETS VIOLENCE A disturbed student shoots up his classroom and suddenly a wave of mass murder is sweeping through our nation's schools A young child is taken from her home and for months afterward child abductions are frantically reported on an almost daily basis A surfer is attacked by a shark and the public spends an entire summer fearing an onslaught of the deadly underwater predators Why do the terrible events we see in the media always seem to lead to more of the same Noted author and cultural behaviorist Loren Coleman explores how the media's over saturated coverage of murders suicides and deadly tragedies makes an impact on our society This is The Copycat Effect the phenomenon through which violent events spawn violence of the same type From recognizing the emerging patterns of the Copycat Effect to how we can deal with and counteract its consequences as individuals and as a culture Loren Coleman has uncovered a tragic flaw of the information age a flaw which must be corrected before the next ripples of violence spread

**The Economics of Terrorism** Peter J. Phillips, 2016-03-10 Brutality is the defining characteristic of terrorism It is despairing to learn that this brutality is the outcome of purposeful rational human behaviour In this purposefulness however there lies the key to the interpretation explanation and understanding of terrorist behaviour Ultimately it is in this purposefulness that we shall also find the key to overcoming terrorism Economic analysis highlights this purposefulness this rationality and in doing so provides a different perspective from which to approach the threat of terrorism and the task of pre-empting and pursuing its perpetrators This book develops this economic perspective within a series of important contexts each characterised by particular types of terrorist behaviour choices and strategies The Economics of Terrorism brings new insights on how to deal with such challenges as the terrorist group's choice of attack method and target location terrorist financing and copycat behaviour

**The Subtlety of Sameness** Robert Matthew French, 1995 The research described in this book is based on the premise that human analogy making is an extension of our constant background process of perceiving in other words that analogy making and the perception of sameness are two sides of the same coin Foreword by Daniel Dennett While it is fashionable today to dismiss the bad old days of artificial intelligence and rave about emergent self-organizing systems Robert French has created a model of human analogy making that attempts to bridge the gap between classical top-down AI and more recent bottom-up approaches The research described in this book is based on the premise that human analogy making is an extension of our constant background process of perceiving in other words that analogy making and the perception of sameness are two sides of the same coin At the heart of the author's theory and computer model of analogy making is the idea that the building up and the manipulation of representations are inseparable aspects of mental functioning in contrast to traditional AI models of high-level cognitive processes which have almost always depended on a clean separation A computer program called Tabletop forms analogies in a microdomain consisting of everyday objects on a table set for a meal The theory and the program rely on

the idea that myriad stochastic choices made on the microlevel can add up to statistical robustness on a macrolevel To illustrate this French includes the results of thousands of runs of his program on several dozen interrelated analogy problems in the Tabletop microworld French s work is exciting not only because it reveals analogy making to be an extension of our complex and subtle ability to perceive sameness but also because it offers a computational model of mechanisms underlying these processes This model makes significant strides in putting into practice microlevel stochastic processing distributed processing simulated parallelism and the integration of representation building and representation processing A Bradford Book **Working Paper Series** ,2001 *The Copycat* Melody Mews,2021-06-29 Itty realizes that she has a copycat in this eighth Itty Bitty Princess Kitty chapter book Itty meets a young tiger named Tessa and it turns out she goes to Itty s school Itty thinks she s nice and funny and she can tell Tessa likes hanging out with her and her friends But then Tessa shows up wearing the same dress as Itty the one Itty had told her about that is very special to her And in art class Tessa copies Itty s drawing Itty doesn t understand why Tessa is being such a copycat Does she really want to be Itty s friend Or does she just want to copy whatever Itty is doing With easy to read language and illustrations on every page the Itty Bitty Princess Kitty chapter books are perfect for emerging readers **The Will to Kill** James Alan Fox,Jack Levin,Kenna Quinet,2005

Employing the general notion of power and control as a central and unifying thesis for understanding why people kill this book provides a comprehensive classification of homicide theories examining the will to kill from various perspectives

**The Comic Artist** Susan Glaspell,Norman Matson,1927 *Civility and Its Discontents* Christine T. Sistare,2004 Contributors from philosophy and political science discuss the observation that civility civic virtue tolerance and socio cultural unity have declined while exploring the nature of civil society the conflict between individual liberty and the common good and the role of law and government policy in weaving the threads of the social fabric From publisher description
