The Asteroids A First:

Discovery of the First Asteroid, Ceres Clifford Cunningham, 2015-10-13 Based on extensive primary sources many never previously translated into English this is the definitive account of the origins of Ceres as it went from being classified as a new planet to reclassification as the first of a previously unknown group of celestial objects Cunningham opens this critical moment of astronomical discovery to full modern analysis for the first time This book includes all the voluminous correspondence translated into English between the astronomers of Europe about the startling discovery of Ceres by Piazzi in 1801 It covers the period up to March 1802 at which time Pallas was discovered Also included are Piazzi's two monographs about Ceres and the sections of two books dealing with Ceres one by Johann Bode the other by Johann Schroeter The origin of the word asteroid is explained along with several chapters on the antecedents of the story going back to ancient Greek times The formulation of Bode's Law is given as are the details on the efforts of Baron von Zach to organize a search for the supposed missing planet between Mars and Jupiter Examples of verse created to commemorate the great discovery are included in this first volume The author who has a PhD in the History of Astronomy is a dedicated scholar of the story of asteroids and his research on the discovery of Ceres is comprehensive and fully sourced The discovery came at a time when rival astronomers were in hot competition with each other and when the true nature of these celestial bodies was not yet known With astronomers in France Italy and beyond vying to understand and receive credit for the new class of astral bodies drama was not in short supply nor were scientific advances

The First History of Man John Bershof, MD, 2024-05-16 In the spirit of medieval writer Chaucer all human activity lies within the artist's scope the History of Man Series uses medicine as a jumping off point to explore precisely that all history all science all human activity since the beginning of time The jumping off style of writing takes the reader the listener into worlds unknown always returning to base only to jump off again History of Man are stories and tales of nearly everything The First History of Man uses infection in general bacteria viruses fungus parasites epidemics pandemics COVID 19 to lay the foundation for the next five books narratives and stories that delve deeper into human infectious diseases This first volume jumps off into accounts of the Big Bang Theory the real one but also the sitcom the origin of the Universe from atoms to DNA to us and how exactly it happened In our journey we'll explore Einstein and Newton who were probably aliens he said jokingly the Roman Empire British history and all those wives of King Henry VIII the why and how of the Protestant Reformation why Pluto lost its planet status in our solar system what exactly is the sweet spot of a solar system all the while digging up some archeology and even paying a visit with Dr Livingstone I presume We'll trudge from the top of Everest the highest point on Earth to the bottom of the Mariana Trench the lowest point on Earth and LUA in between the Last Universal Ancestor that gave rise to all life on Earth

The First Space War J. Furman Daniel III, T.K. Rogers, 2019-10-17 Unfortunately much of what people believe about war in space has been shaped or misshaped by Hollywood and other forms of popular media In this book a STEM educator and a political science professor

team up to explore the possibilities for warfare in space and explain why almost everything you've learned about space wars from movies is disappointingly wrong. The truth is stranger and more interesting than fiction. Using history, politics, and STEM as guides, this book provides a detailed account of how Earth's first war in space will be fought. As we show, it will begin not as an invasion of Earth by super-advanced aliens, but by Earth starting a war with its Martian colony. Public School Series.
