The Costs Of Economic Liberalization In Turkey:

The Costs of Economic Liberalization in Turkey Mehmet Odekon,2005 This book s main theme is that the neoliberal economic policies forced on developing countries by the International Monetary Fund and the World Bank serve the interests of Western industrial countries more than those of developing countries as the post 1980 Turkish experience illustrates Within a simple dependency oriented framework the book presents the effects of liberalization policies in Turkey These policies were mostly concerned with allocative efficiency disregarding distributional efficiency issues The results were not always socially or politically desirable These policies consistently favored capital over labor and created an economic system that made the rich richer and the poor poorer Privatization in the name of raising allocative efficiency contributed to increasing inequality and poverty Anti inflationary policies debt reduction schemes environmental policies and agricultural reforms all favored the interests of high income groups transferring surplus from the national metropolis to the international metropolis or by restructuring the developing countries output input and financial markets so that any exchange between developing and industrial countries would

introduced In this paper we will look at the Turkey s trade policy before and after the liberalization reforms of the 1980 s Trade liberalization mostly implies less intervention by the government in the traded goods sectors But whether a less interventionist trade regime results in a less distorted more open and outward oriented economy will depend on the characteristics of the pre and post reform trade and exchange rate regimes This paper aims to present a general survey about Turkish trade policy a bird s eye view The author therefore abstains from generating a model and test the impact of the reforms on one single industry Instead such regression results are rather resorted to other studies in order to generate an appropriate picture of the trade liberalization as a whole without getting stucked into detail too much on the one hand and without staying out of detail too much on the other hand The rst section outlines the economical background of Turkey from the pre 1980 reform period at rst and con tinues with a presentation of the reforms imposed from 1980 onwards It draws a historical picture as well as it points out the main impacts on the export and import pattern of Turkey s foreign trade The following section deals with Turkey s accession of the Customs Uni
