## **The Crowd:**

*The Crowd in the Early Middle Ages* Shane Bobrycki, 2024-11-19 The importance of collective behavior in early medieval Europe By the fifth and sixth centuries the bread and circuses and triumphal processions of the Roman Empire had given way to a quieter world And yet as Shane Bobrycki argues the influence and importance of the crowd did not disappear in early medieval Europe In *The Crowd in the Early Middle Ages* Bobrycki shows that although demographic change may have dispersed the urban multitudes of Greco Roman civilization collective behavior retained its social importance even when crowds were scarce Most historians have seen early medieval Europe as a world without crowds In fact Bobrycki argues early medieval European sources are full of crowds although perhaps not the sort historians have trained themselves to look for Harvests markets festivals religious rites and political assemblies were among the gatherings used to regulate resources and demonstrate legitimacy Indeed the refusal to assemble and other forms of slantwise assembly became a weapon of the powerless Bobrycki investigates what happened when demographic realities shifted but culture religion and politics remained bound by the past The history of crowds during the five hundred years between the age of circuses and the age of crusades Bobrycki shows tells an important story one of systemic and scalar change in economic and social life and of reorganization in the world of ideas and norms

### **Wisdom of the Crowd in Experiments**

Larissa Katharina Senninger, 2018-11-03 Larissa Katharina Senninger analyses the phenomenon of wisdom of the crowd in experimental capital markets Aiming to find out which market mechanism is able to aggregate different information in a meaningful way a continuous double auction and a call auction mechanism are tested In line with expectations markets with continuous double auction mechanism are better able to aggregate information and additionally take a shorter time The author shows that receiving more information enables subjects to make better estimations whereas more information improves the quality of estimations significantly only if it is a lot more information
