Through Science To God:

From Science to God Peter Russell, 2010-02-08 Peter Russell's book is not only eminently readable but also a vitally important contribution to the awakening of human consciousness Eckhart Tolle author of *The Power of Now* *From Science to God* offers a crash course in the nature of reality It is the story of Peter Russell's lifelong exploration of the nature of consciousness of how he went from being a convinced atheist studying mathematics and physics to realizing a profound personal synthesis of the mystical and scientific Russell invites us to cross that bridge to a radically different and ultimately healing view of ourselves and the universe one in which God takes on new meaning and spiritual practice a deeper significance *Through Science to God* Floyd Lavern Darrow, 1925 *Through Science to God* Nathan Ayer Smyth, 1936

Seeing God Through Science Barry David Schoub, 2019-08-27 It has been said that science and religion aren't friends Indeed science and scientists are preferably shunned in conservative religious circles *Seeing God through Science* however emphatically dispels that notion This book compellingly shows how science is in point of fact a potent support for religious faith From the powerful universal biological drives of living organisms to the unimaginable vastness of the universe science cogently frames the fundamental questions of meaning and purpose Answers to these questions however lie outside science It is solely through religious revelation that acceptable answers close the circle of enquiry into truth In addition examples from the sciences of genetics and cosmology illustrate the typical pattern of metascience i.e. the process of science which advances toward a frontier only to generate further avenues of exploration but never reaches a finality of knowledge Thus metascience steers enquiry to a supernatural reality answerable only through religious revelation This book shows how modern science is now entering a new phase where what is unattainable by the science of nature constitutes a message to humankind that there exists a supernatural being who created and controls the universe Modern science is now coming to prove God *Through Science to God* Floyd Lavern Darrow, 1925 *Revelation Through Science* James G.

Martin, 2016-11-09 *Revelation through Science* is written for the educated non scientist who may be troubled by apparent conflicts between science and religion Are science and faith incompatible Astronomers physicists and biologists have now shown that the more deeply science probes nature the more it reveals evidence pointing us to God After reviewing concepts from those fields *Revelation through Science* adds new material from chemistry It describes organic structures that are profoundly vital for life yet too complex for self assembly without some guiding principle It should lift the burden from believers and seekers to realize that science is not the enemy of faith **Metaphors for God's Time in Science and Religion**

S. Happel, 2016-05-20 *Metaphors for God's Time in Science and Religion* examines the exploratory work of metaphors for time in astrophysical cosmology chaos theory evolutionary biology and neuroscience Happel claims that the Christian God is intimately involved at every level of physical and biological science He compares how scientists and theologians both generate stories metaphors and symbols about the universe and asks who is the God who invents me

Bauer,2010-12 Frederick R Bauer captures the essence of William James in *Science God's Hard Gift* We have all heard the word pragmatic It entered our everyday vocabulary as a result of a series of lectures delivered by William James the greatest of all great American thinkers He gave those lectures in 1906 four years before his death at age sixty eight in 1910 In the first of those lectures James described the type of person he wanted to reach a person not unlike a large number of persons today He wants facts he wants science James said but he also wants a religion James did not live to see the incredible new scientific discoveries of the 1900s Those discoveries have led increasing numbers of experts to claim that modern science has made religion obsolete *Science God's Hard Gift* celebrates this centenary of James's death by updating and expanding his ideas on pragmatism for those contemporaries who want facts and science but also a religion
