The Vendee Charles Tilly, 1964 Studie over de boerenopstand rond 1793 toegespitst op de Franse landstreek **The Vendée /by Charles Tilly** Charles Tilly, 1976 *Social Origins of Dictatorship and Democracy* Barrington Moore, 2015-12-08 This classic work of comparative history explores why some countries have developed as democracies and others as fascist or communist dictatorships Originally published in 1966 this classic text is a comparative survey of some of what Barrington Moore considers the major and most indicative world economies as they evolved out of pre modern political systems into industrialism But Moore is not ultimately concerned with explaining economic development so much as exploring why modes of development produced different political forms that managed the transition to industrialism and modernization Why did one society modernize into a relatively free democratic society by which Moore means England Why did others metamorphose into fascist or communist states His core thesis is that in each country the relationship between the landlord class and the peasants was a primary influence on the ultimate form of government the society arrived at upon arrival in its modern age Throughout the book there is the constant play of a mind that is scholarly original and imbued with the rarest gift of all a deep sense of human reality This book will influence a whole generation of young American historians and lead them to problems of the greatest significance The New York Review of Books La Vendée /by Charles Tilly Charles Tilly, 1976 Undisciplining Knowledge Harvey J. Graff, 2015-08-01 The first critical history of interdisciplinary efforts and movements in the modern university Interdisciplinarity or the interrelationships among distinct fields disciplines or branches of knowledge in pursuit of new answers to pressing problems is one of the most contested topics in higher education today Some see it as a way to break down the silos of academic departments and foster creative interchange while others view it as a destructive force that will diminish academic quality and destroy the university as we know it In Undisciplining Knowledge acclaimed scholar Harvey J Graff presents readers with the first comparative and critical history of interdisciplinary initiatives in the modern university Arranged chronologically the book tells the engaging story of how various academic fields both embraced and fought off efforts to share knowledge with other scholars It is a story of myths exaggerations and misunderstandings on all sides Touching on a wide variety of disciplines including genetic biology sociology the humanities communications social relations operations research cognitive science materials science nanotechnology cultural studies literacy studies and biosciences the book examines the ideals theories and practices of interdisciplinarity through comparative case studies Graff interweaves this narrative with a social institutional and intellectual history of interdisciplinary efforts over the 140 years of the modern university focusing on both its implementation and evolution while exploring substantial differences in definitions goals institutional locations and modes of organization across different areas of focus Scholars across the disciplines specialists in higher education administrators and interested readers will find the book s multiple perspectives and practical advice on building and operating and avoiding
