Time And Eternity The Medieval Discourse:

Time and Eternity Gerhard Jaritz, Gerson Moreno-Riaño, 2003 This volume is composed of selected papers that attest to the fact that the medieval experience of time and eternity was rich and complex and that its investigation is open to various approaches and methods The volume is organised into themes dealing with the computation of time and the use of calendars Jewish concepts of time and redemption Christian philosophies of eternity and time monastic and clerical conceptions literary representations time and art and apocalyptic expectations

The Concepts of Time in Anglo-Saxon England Kaifan Yang, 2020-04-02 The book examines the diachronic change of time perception throughout Anglo Saxon England with the conversion as a turning point It draws evidence from a variety of sources in particular from a close reading of Bede s historical writings and his treatises on time from Old English poetry especially *The Dream of the Rood* *The Phoenix* *The Wanderer* *Beowulf* *The Ruin* *Deor* from the literature of the Alfredian period and from the lexical and statistical analysis of Old English time words It offers insights into the complexity of time in the Anglo Saxon context and shows how the change of time can help to understand the conceptual system of the Anglo Saxons

[Imaginings of Time in Lydgate and Hoccleve's Verse](#) Karen Elaine Smyth, 2016-05-13 Using empirical research to explore medieval writers imaginings of time this study presents a new morphology by which to study narratives of time in fifteenth century literary culture focusing on poems of John Lydgate and Thomas Hoccleve Karen Smyth begins with an overview of medieval time keeping devices and considers collective and individual attitudes and perceptions of time She then examines a range of Middle English authors appropriations and innovations in relation to such perceptions identifying competitions of tradition and innovation allowing for an interrogation of commonly accepted medieval theories of time An empirically based morphology emerges and is used to examine narratives of time in Lydgate and Hoccleve s work Through a series of close readings of selected short poems and Lydgate s *Troy Book* *Fall of Princes* and *Siege of Thebes* and of Hoccleve s *Regiments of Princes* and *Series* Karen Smyth looks at expressions of time and examples of the authors negotiation of time consciousness illustrating how both poets manipulate a range of cultural narratives of time in order to create multiple and sometimes competing temporalities within a single poem Smyth simultaneously draws attention to Lydgate s and Hoccleve s underestimated artistic skills and lays out a means to re evaluate medieval cultural attitudes towards time

Bede and the End of Time Dr Peter Darby, 2013-07-28 Bede c 673 735 was the leading intellectual figure of the Anglo Saxon Church and his writings had a profound influence on the development of English Christian thought Among the many issues he wrote about eschatology the study of the day of judgment and the end of time was a recurring theme Whilst recent research has furthered our knowledge of this subject in the later Middle Ages Dr Darby s book provides the first comprehensive analysis of Bede s eschatological thought and its impact upon the Anglo Saxon period Taking account of Bede s beliefs about the end of time this book offers sophisticated insights into his life his works and the role that eschatological thought played in Anglo Saxon society Close attention is given

to the historical setting of each source text consulted and original insights are advanced regarding the chronological sequence of Bede's writings. The book reveals that Bede's ideas about time changed over the course of his career and it shows how Bede established himself as the foremost expert in eschatology of his age. The eight chapters of this book are organised into three main thematic groups: the world ages framework, Bede's eschatological vision, and Bede's eschatological perspective. It will be of interest to those studying early medieval history, theology, or literature, as well as anyone with a particular interest in Bede and Anglo-Saxon England.

Medieval Life Cycles Isabelle Cochelin, Karen Elaine Smyth, 2013. The essays in this collection present new research into a variety of questions on birth, childhood, adolescence, adulthood, middle age, and old age, ordered in a more or less chronological manner according to the lifecycle. The volume exposes attitudes and representations of the lifecycle from the Anglo-Saxon period to the end of the Middle Ages, as being full of inconsistencies, as well as definitive categories and of variation and stasis. This attests to the fact that medieval conceptions and representations of the stages of life and their interrelationships are much more nuanced and less idealized than is usually credited. Medieval conceptual, mental, artistic, cultural, and sociological processes are scrutinized using various approaches and methods that cross disciplinary boundaries. What is emphasized across the volume is that there were varying context-dependent rhythms of continuity and change in every stage of life in the medieval period. The volume's selection of authors is international in scope and represents some of the leading current scholarship in the field.

Aspects of Power and Authority in the Middle Ages Brenda Bolton, Christine Meek, 2007. Concepts of power and authority and the relationship between them were fundamental to many aspects of medieval society. The essays in this collection present a series of case studies that range widely both chronologically and geographically, from Lombard Italy to early modern Iberia and from Anglo-Saxon, Norman, and later medieval England to twelfth-century France and the lands beyond the Elbe in the conversion period. While some papers deal with traditional royal, princely, and ecclesiastical authority, they do so in new ways. Others examine groups and aspects less obviously connected to power and authority, such as the networks of influence centring on royal women or powerful ecclesiastics, the power relationships revealed in Anglo-Saxon and Old Norse literature, or the influence that might be exercised by needy crusaders, by Jews with the ability to advance loans, or by parish priests on the basis of their local connections. An important section discusses the power of the written word, whether papal bulls, collections of miracle stories, or the documents produced in lawsuits. The papers in this volume demonstrate the variety and multiplicity of both power and authority and the many ways by which individuals exercised influence and exerted a claim to be heard and respected.
