**Time in Contemporary Musical Thought** Jonathan D. Kramer, 2015-12-22 The articles in this collection create an interdisciplinary perspective While attempting no unified vision it approaches the subject from a variety of perspectives aesthetics psychology sociology ethnomusicology compositional practice and semiotics While all composers are necessarily concerned with time and while all theorists deal at least indirectly with music as a temporal phenomenon the study of musical time has been fragmented It is appropriate that no clear paradigm model or direction has yet emerged in the study of musical time since time itself is both pervasive and elusive

**Writing through Music** Jann Pasler, 2007-12-12 Drawing on a passion for music a remarkably diverse interdisciplinary toolbox and a gift for accessible language that speaks equally to scholars and the general public Jann Pasler invites us to read as she writes through music unveiling the forces that affect our sonic encounters In an extraordinary collection of historical and critical essays some appearing for the first time in English Pasler deconstructs the social moral and political preoccupations lurking behind aesthetic taste Arguing that learning from musical experience is vital to our understanding of past present and future Pasler's work trenchantly reasserts the role of music as a crucial contributor to important public debates about who we can be as individuals communities and nations The author's wide ranging and perceptive approaches to musical biography and history challenge us to rethink our assumptions about important cultural and philosophical issues including national identity and postmodern musical hybridity material culture the economics of power and the relationship between classical and popular music Her work uncovers the self-fashioning of modernists such as Vincent d'Indy Augusta Holm's Jean Cocteau and John Cage and addresses categories such as race gender and class in the early 20th century in ways that resonate with experiences today She also explores how music uses time and constructs narrative Pasler's innovative and influential methodological approaches such as her notion of question spaces open up the complex cultural and political networks in which music participates This provides us with the reasons and tools to engage with music in fresh and exciting ways In these thoughtful essays music whether beautiful or cacophonous reassuring or seemingly incomprehensible comes alive as a bearer of ideas and practices that offers deep insights into how we negotiate the world Jann Pasler's Writing through Music brilliantly demonstrates how music can be a critical lens to focus the contemporary critical cultural historical and social issues of our time

**Postmodern Music, Postmodern Listening** Jonathan D. Kramer, 2016-08-11 Kramer was one of the most visionary musical thinkers of the second half of the 20th century In his *The Time of Music* he approached the idea of the many different ways that time itself is articulated musically This book has become influential among composers theorists and aestheticians Now in his almost completed text written before his untimely death in 2004 he examines the concept of postmodernism in music Kramer created a series of markers by which we can identify postmodern works He suggests that the postmodern project actually creates a radically different relationship between the composer and listener Written with wit precision and at times playfully subverting traditional tropes to make a very serious point about this difference *Postmodern Music Postmodern Listening* leads us to a strongly grounded intellectual basis for stylistic description and an intuitive sensibility of what postmodernism in music entails *Postmodern Music Postmodern Listening* is an examination of how musical postmodernism is not just a style or movement but a fundamental shift in the relationship between composer and listener The result is a multifaceted and provocative look at a critical turning point in music history one whose implications we are only just beginning to understand

*The Idea of Time* Charles Hepworth Holland, 1999-05-04 *The Idea of Time* Charles Hepworth Holland Trinity College Dublin Eire What is time What do we understand when we think about time What do we mean by now This book covers concisely all the different aspects of time with an anchoring point within the geological sciences Here successions of strata are seen as representing successions of events in the long history of the earth palaeontology provides a record of organic evolution through nearly the whole of these several thousand million years The rest of the book diversifies in discussing the measurement of time both physically and biologically our human perception of it the ending of personal time in death the pervading presence of time in the arts out through astronomy to cosmology into philosophy and religion The idea of time is a very complex one but this book undertakes a journey to prove that it is not beyond comprehension

*Canadian Journal of Psychiatry*, 1992

**Aging and the Meaning of Time** Susan H. McFadden, Robert C. Atchley, 2001 The authors from diverse disciplines in gerontology act as guides in the exploration of the realms of time in later life and its meanings As the authors examine how the study of time can give new meanings to aging they also consider the religious and spiritual questions raised when human beings consider the temporal boundaries of life This volume honors Melvin Kimble's contributions to gerontology and represents a new direction in the study of religion spirituality and aging

**What, Then, Is Time?** Eva Brann, 1999-07-15 What is time Well known philosopher and intellectual historian Eva Brann mounts an inquiry into a subject universally agreed to be among the most familiar and the most strange of human experiences Brann approaches questions of time through the study of ten famous texts by such thinkers as Plato Augustine Kant Husserl and Heidegger showing how they bring to light the perennial issues regarding time She also offers her independent reflections Examining the three phases of time past present and future she argues that neither external time nor the time of the human past is real the one is a comparison of motions and the other

a projection of memory She concludes that true time is internal and has its origin in the imaginative structure of memory and expectation Throughout her rich and original study Brann never fudges the central fact that time is a mystery **The Study of Time** ,1996 **Jyväskylä studies in the arts** ,1995 **A Study of Community Pharmacy Practice Sites** Mary Kathleen Gurney,2003 **Psychoanalysis and Contemporary Thought** ,1995 **Journal of Geriatric Psychiatry** ,1994 Choice ,1990 In Others' Eyes Günter H. Seidler,2000 As Leon Wurmser notes in his Foreword this challenging and important book advances an entirely new theory of affect development consciousness relation and illness To establish his theory the author draws on his clinical experience along with a wide range of literature philosophy psychology and mythology from many different cultures *Frames and Framing* Richard Littlefield,2001
