Smart Energy Practices for a Sustainable World Nina S. Godbole, John P. Lamb, 2023-06-13 Mankind has scaled unprecedented growth since the advent of the Industrial Revolution. However, this progress has come at the hefty cost of environmental degradation. Climate change undeniably is one of the biggest challenges of the planet Earth and is largely anthropogenic. In the modern world context, the phenomenon of climate change is one of the most defining issues when it comes to realizing objectives of the Sustainable Development Goals (SDGs). Climate change is not limited to geographical boundaries; it is a global problem hence requires global solutions. It has been widely discussed and therefore has acquired centre stage across the major world forums. *Smart Energy Practices for a Sustainable World* how we all can contribute stresses the need for us to judiciously, sustainably and smartly harness and use energy techniques in order to effectively combat climate change. The book also gives an in-depth discussion on utilization of artificial intelligence and information technology to realize energy efficiency in various sectors of economy including but not limited to transportation, buildings, infrastructure, health care and other services. Text is supplemented by case studies that depict ground level reality to facilitate comprehension of the subject matter. The appendices serve as an extended learning of the concepts discussed in the chapters. The publication would serve as a valuable reference for both scholars and researchers engaged in the domain in addition to being a guide to industry as well as the academic world.

Climate Change and the Health Sector Alexander Thomas, K. Srinath Reddy, Divya Alexander, Poornima Prabhakaran, 2021-11-22 The health sector is known to be one of the major contributors towards the greenhouse gas emissions causing the climate crisis, the greatest health threat of the 21st century. This volume positions the health sector as a leader in the fight against climate change and explores the role of the health system in climate policy action. It delivers an overview of the linkages between climate change and the health sector with chapters on the impact of climate change on health, its connection to pandemics and its effects on food nutrition and air quality while examining gendered and other vulnerabilities. It delves into the different operational aspects of the health sector in India and details how each one can become climate smart to reduce the health sector's overall carbon footprint by looking at sustainable procurement, green and resilient healthcare infrastructure and the management of transportation, energy, water, waste, chemicals, pharmaceuticals and plastics in healthcare. Well supplemented with rigorous case studies, the book will be indispensable for students, teachers and

researchers of environmental studies health sciences and climate change It will be useful for healthcare workers public health officials healthcare leaders policy planners and those interested in climate resilience and preparedness in the health sector The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Sustainable Development Goals (SDGs) They highlight ways to raise ambition through law and policy to reform national legal and institutional arrangements to implement NDCs and to further develop international law and governance in the face of the existential threat of climate change and the world sustainable development commitments Presenting a pathway for advancing climate ambition in the coming decades this book will be of interest to government officials academics students professionals and policy makers working in the area of climate law and governance *Climate Change in Human History* Benjamin Lieberman, Elizabeth Gordon, 2021-12-02 PROSE Award for Excellence in Humanities Finalist 2023 *Climate Change and Human History* provides a concise introduction to the relationship between human beings and climate change throughout history Starting hundreds of thousands of years ago and going up to the present day this book illustrates how natural climate variability affected early human societies and how human activity is now leading to drastic changes to our climate Taking a chronological approach the authors explain how climate change created opportunities and challenges for human societies in each major time period covering themes such as phases of climate and history climate shocks the rise and fall of civilizations industrialization accelerating climate change and our future outlook This 2nd edition includes a new chapter on the explosion of social movements protest groups and key individuals since 2017 and the implications this has had on the history of climate change an improved introduction to the Anthropocene and extra content on the basic dynamics of the climate system alongside updated historiography With more case studies images and individuals throughout the text the second edition also includes a glossary of terms and further reading to aid students in understanding this interdisciplinary subject An ideal companion for all students of environmental history *Climate Change and Human History* clearly demonstrates the critical role of climate in shaping human history and of the experience of humans in both adapting to and shaping climate change **Media, Politics and Environment** Detlef Briesen, Sarada Prasanna Das, 2023-07-15 Environmental protection has not equally established itself as a permanent fixture in the political systems of all countries to date governments and entire societies have responded to environmental challenges in a variety of ways and concrete environmental policy is still a highly national matter Moreover the perception of environmental problems varies considerably on a global scale The reasons normally cited for these differences largely stem from the environmental policy debates themselves e.g. poverty ignorance capital interests etc In contrast this book shows that concrete environmental policy emerges from a complex interplay of mass media and political conflicts first the mass media provide the framework for national environmental policy through agenda setting framing and scandalization second the mass media thereby change values in the political and social discourse e.g. by altering the perception of global commons and expanding the possibilities of interest articulation and third this can lead to political decision making processes in which legal and other measures for environmental protection are enforced The book systematically compares industrialized countries such as Germany and Japan with several rapidly emerging countries in South and Southeast Asia Export Product Quality, Renewable Energy,

and Sustainable Production, 3rd edition Umer Shahzad, Gagan Deep Sharma, Lianbiao Cui, John Mendy, 2025-11-20 Economic development has long been acknowledged for its beneficial effects on human well being In the context of economic globalization and vertical specialization increasing the quality of export products is more critical and necessary to export success and sustainable development The product's quality is inextricably linked to its manufacture and production which need various types of energy and raw materials Meanwhile the adoption of more environmentally friendly and cleaner energy sources contributes to the achievement of sustainable production Therefore product quality may provide a new perspective from which to investigate the systematic relationship between greener and renewable energy sources sustainable production and environmental regulations as well as the nature of export competitiveness Generally export product quality has referred to the quality of manufactured products within the product lines Quality refers to the relative price of a country's varieties within their respective product lines Product sophistication assesses the composition of the aggregate exports Different varieties of same product as per quality level are being produced by several developing and emerging economies Within any given product line quality converges both conditionally and unconditionally to the world's benchmark increases in institutional quality and human capital are associated with faster quality upgrading In turn faster growth in quality is associated with more rapid output growth The existing literature has mostly concentrated on the question of whether environmental regulation enhances or erodes export competitiveness offering some valuable insights into Porter's theory but it lacks a coherent theoretical framework Little research has been done to examine the relationship between export product quality and renewable energy sources manufacturing and overall sustainable production calling for advancement of the scholarship to tackle this burning issue Numerous concerns have been expressed over the appalling connection between sustained development industry and environmental protection The United Nations UN adopted the 2030 Agenda for Sustainable Development in 2015 to balance economic social and environmental development through the introduction of 17 Sustainable Development Goals SDG which encouraged researchers in trade environment energy and related fields to adopt an integrative rather than isolative approach This Research Topic is dedicated to the study of the environment through the lenses of export product quality export policies and sustainable production The aim is to advance knowledge in the fields of export quality trade perspectives renewable energy the environment and sustainable production through the dissemination of research that promotes holistic sustainability for the greater welfare of humanity This topic will prioritize research focusing on emerging and developing economies Academic scholars and researchers must both test hypotheses and put forward ideas for new solutions For example it is assumed that higher quality products require expensive inputs and resources for manufacturing It must also provide strategies for a speedy and economically viable transition to renewable energy This Research Topic is a step in this direction

The Top Books of the Year Top Carbon Footprint The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have enthralled audiences this year. Top Carbon Footprint : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Top Carbon Footprint : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
