Universal History Of Linguistics:

Universal History of Linguistics Esa Itkonen, 1991-12-05 This wide ranging book presents the linguistic achievements of four major cultures to readers presumably conversant with modern theoretical linguistics The chapter on India discusses in detail P n ini s c 400 B C grammar Ast adhy ay i as well as the work of his commentators K ty yana Patanjali and Bhartr hari In the Chinese tradition the Confucian doctrine of the Rectification of Names is singled out for treatment Arabic linguistics is represented by Sibawaihi s d 793 grammar al Kit b in particular its syntax as well as the subsequent commentary tradition The chapter on Europe which is the most comprehensive of the four covers the time span from antiquity to the 20th century special attention is devoted to the contributions of Plato Aristotle the Stoics Varro Apollonius Dyscolus and the Modistae The achievements of the cultures in linguistics are treated throughout from a deliberately value laden point of view The achievements of Western antiquity and the Middle Ages are shown to be much more than the average linguist is inclined to believe Even more importantly it is shown that the Indian and the Arab traditions have been superior to the European tradition at least until the 20th century The fact that a linguistic theory created some 2 400 years ago is fully as adequate as our best theories today must have far reaching implications for the notion of scientific progress More precisely it proves necessary to distinguish between progress in the human sciences and progress in the natural sciences These issues which pertain to the general philosophy of science are treated in the final chapter of the book *Universal Grammar in Second-Language Acquisition* Margaret Thomas, 2004-07-31 This book discusses how scholars in the west have conceived that human languages share important properties and how westerners have understood the nature of second or foreign language learning
