Cognitive Foundations of Grammar Bernd Heine, 1997-11-27 The main function of language is to convey meaning Therefore argues Bernd Heine in these pages the question of why language is structured the way it is must first of all be answered with reference to this function Linguistic explanations offered in terms of other exponents of language structure for example syntax are likely to highlight peripheral or epi phenomenal rather than central characteristics of language structure Heine provides a solid introductory treatment of the ways in which language structure that is grammar and language usage can be explained with reference to the processes underlying human conceptualization and communication Exploring an area of linguistics that has developed only recently and is rapidly expanding Cognitive Foundations of Grammar will appeal to students of linguistics psychology and anthropology especially those interested in grammaticalization processess

Cognitive Foundations of Grammar Institute of African Studies University of Cologne Bernd Heine Professor of Linguistics, 1997-10-31 The main function of language is to convey meaning The question of why language is structured the way it is Heine here argues has therefore to be answered first of all with reference to this function Linguistic explanations in terms of other exponents of language structure e g of syntax are likely to highlight peripheral or epi phenomenal rather than central characteristics of language structure This book uses basic findings on grammaticalization processes to describe the role of cognitive forces in shaping grammar It provides students with an introductory treatment of a field of linguistics that has developed recently and is rapidly expanding

Constituent Order in the Languages of Europe Anna Siewierska, 2010-12-14

Linguistic Diversity and Language Theories Zygmunt Frajzyngier, Adam Hodges, David S. Rood, 2005-01-01 From the refinement of general methodology to new insights of synchronic and diachronic universals to studies of specific phenomena this collection demonstrates the crucial role that language data play in the evolution of useful accurate linguistic theories Issues addressed include the determination of meaning in typological studies a refined understanding of diachronic processes by including intentional social statistical and level determined phenomena the reconsideration of categories such as sentence evidential or adposition and structures such as compounds or polysynthesis the tension between formal simplicity and functional clarity the inclusion of unusual systems in theoretical debates and fresh approaches to Chinese classifiers possession in Oceanic languages and English aspect This is a careful selection of papers presented at the International Symposium on Linguistic Diversity and Language Theories in Boulder Colorado The purpose of the Symposium was to confront fundamental issues in language structure and change with the rich variation of forms and functions observed across languages

Universals of Human Language: Word structure Joseph Harold Greenberg, Charles Albert Ferguson, Edith A. Moravcsik, 1978 The 46 papers in this 4 volume collection provide clear and certain evidence that

the search for implicational universals of human language that is for valid empirical generalizations such as if property Y exists in a language then property X must exist as well has established itself once and for all as a powerful and dynamic force in modern linguistics Concomitantly the collection attests to a broadened use among scholars engaged in universals research of a theoretical and methodological strategy pioneered elaborated and most extensively applied by Joseph Greenberg that contrasts in fundamental respects with procedures favored by generative grammarians Finally and most impressive of all the papers present abundant results a profusion of concrete findings that should persuade even the most hardened skeptics that implicational principles have a great deal to tell about what human language is and how it got to be that way from <http://www.jstor.org> May 21 2014 Syntax Joachim Jacobs,1993 University of California Publications in Linguistics ,1943 **The World Atlas of Language Structures** Martin Haspelmath,2005-07-21 The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world's languages 142 world maps and numerous regional maps all in colour display the geographical distribution of features of pronunciation and grammar such as number of vowels tone systems gender plurals tense word order and body part terminology Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps to display bibliographical sources and to establish correlations between features The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages The Atlas will be especially valuable for linguistic typologists grammatical theorists historical and comparative linguists and for those studying a region such as Africa Southeast Asia North America Australia and Europe It will also interest anthropologists and geographers More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics No institution involved in language research can afford to be without it **Linguistics** ,1990 **Handbook of Psychological Anthropology** Philip K. Bock,1994-10-30 The renewal of interest in psychological anthropology has called for a critical appraisal of past schools and approaches as well as an up to date review of the literature and evidence from contemporary research This handbook the first reference work devoted to this growing field draws upon the work of distinguished contributors to examine historical methodological and critical material related to psychological anthropology The volume is organized in two parts The first is an historical overview of the field from 1920 to the present outlining the major schools and approaches that have contributed to psychological anthropology The second part is a series of chapters on research topics and methods such as child development dreams discourse and the arts showing the contribution of these topics to our understanding of the relationship between cultural and individual phenomena The book reflects diverse viewpoints and provides a current treatment of ideas and techniques critical examinations of research and extensive bibliographic information □□□□□□□□□□ ,1985 The Boy from Bundaberg Andrew Pawley, Malcolm Ross, Darrell
