**Academic Capitalism and the New Economy** Sheila Slaughter, Gary Rhoades, 2009-06-01 As colleges and universities become more entrepreneurial in a post industrial economy they focus on knowledge less as a public good than as a commodity to be capitalized on in profit oriented activities In *Academic Capitalism and the New Economy* higher education scholars Sheila Slaughter and Gary Rhoades detail the aggressive engagement of U S higher education institutions in the knowledge based economy and analyze the efforts of colleges and universities to develop market and sell research products educational services and consumer goods in the private marketplace Slaughter and Rhoades track changes in policy and practice revealing new social networks and circuits of knowledge creation and dissemination as well as new organizational structures and expanded managerial capacity to link higher education institutions and markets They depict an ascendant academic capitalist knowledge learning regime expressed in faculty work departmental activity and administrative behavior Clarifying the regime s internal contradictions they note the public subsidies embedded in new revenue streams and the shift in emphasis from serving student customers to leveraging resources from them Defining the terms of academic capitalism in the new economy this groundbreaking study offers essential insights into the trajectory of American higher education

The Market Imperative Robert Zemsky, Susan Shaman, 2017-12-22 Thinking about American higher education as an economic market changes everything It is no surprise that college tuition and student debt are on the rise Universities no longer charge tuition to simply cover costs They are market enterprises that charge whatever the market will bear Institutional ambition along with increasing competition for students now shape the economics of higher education In *The Market Imperative* Robert Zemsky and Susan Shaman argue that too many institutional leaders and policy makers do not understand how deeply the consumer markets they promoted have changed American higher education Instead of functioning as a single integrated industry higher education is in fact a collection of segmented and more or less separate markets These markets have their own distinctive operating constraints and logics especially regarding price But those most responsible for federal higher education policy have made a muck of the enterprise while state policy making has all but disappeared the victim of weak imaginations insufficient funding and an aversion to targeted investment Chapter by chapter this compelling text draws on new data developed by the authors in a Gates Foundation funded project to describe the landscape how the market for higher education distributes students among competing institutions what the job market is looking for how markets differ across the fifty states and how the higher education market determines the kinds of faculty at different kinds of institutions The volume concludes with a three pronged set of policies for making American higher education mission centered as well as market smart Although there is no one size fits all approach for reforming higher education this clearly written book will productively advance understanding of the challenges colleges and universities face by providing a mapping of the configuration of the market for an undergraduate education
