Unsolved Problems Of The Milky Way:

Unsolved Problems of the Milky Way Leo Blitz, Peter Teuben, 2013-11-11 Although the Milky Way is the most studied and best understood galactic system there are many fundamental questions about our Galaxy that remain unanswered This book concentrates on those questions which have the widest applicability in all of astrophysics and for which answers are most likely to be forthcoming in the next few years Is the Milky Way a barred spiral and if so what are its properties Is the disk of the Milky Way axisymmetric and what does the answer tell us about its dynamical history Is there a black hole at the center of the Galaxy How far does the Galaxy extend How much dark matter is there in the Milky Way system And more

Unsolved Problems of the Milky Way International Astronomical Union Symposium, 1996 *Unsolved Problems in Stellar Evolution* Space Telescope Science Institute (U.S.), 2000-04-13 The most comprehensive and up to date survey available on stellar structure and evolution with a special emphasis on currently unsolved problems *The Milky Way Galaxy* Hugo van Woerden, Ronald J. Allen, W.B. Burton, 2012-12-06 In June 1983 the Astronomical Institute of the State University of Groningen founded by Kapteyn about 100 years ago celebrated its one hundredth anniversary At the suggestion of its Chairman R J Allen the Kapteyn Institute invited the International Astronomical Union to mark the centenary by holding a Symposium on The Milky Way Galaxy The purpose of the Symposium was to review recent progress in the study of our Galaxy to define current problems and to explore prospects for future development The Symposium programme would emphasize the large scale characteristics of our Galaxy and highlight both the historical development of our understanding of the Milky Way Galaxy and the importance of studies of external galaxies to this understanding The Symposium was sponsored by four IAU Commissions 33 Structure and Dynamics of the Galactic System 28 Galaxies 34 Interstellar Matter and 41 History of Astronomy The Scientific Organizing Committee listed on page xviii represented a broad range of nationalities and of expertise including two historians of science A meeting of the Committee held during the IAU General Assembly at Patras provided an excellent opportunity to discuss plan and format of the Symposium topics and speakers thereafter the Committee was regularly consulted by letter and telephone IAU Symposium 106 was held at Groningen on 30 May 3 June 1983 in the new building occupied by the Kapteyn Institute since January 1983 There were about 200 participants coming from as many as 25 countries *Astronomical and Astrophysical Objectives of Sub-Milliarcsecond*

Optical Astrometry Erik Høg, P. Kenneth Seidelmann, 2013-12-01 Astrometry is on the threshold of great changes due to the fact that this decade alone is witnessing an improvement of stellar positions equivalent to the total improvement of the previous two centuries The Hipparcos Satellite has concluded its observations and the catalog is in preparation Preliminary results assure that the Hipparcos catalog will provide positions parallaxes and annual proper motions for over 100 000 stars with accuracies of 1.5 milliarcseconds In addition the Tycho catalog will provide positions of about 30 milliarcseconds accuracy for over 1 million stars and annual proper motions with 3 milliarcsecond accuracy will subsequently be obtained by means of first epoch positions from the Astrographic Catalog Optical interferometers on the ground are beginning operation and these instruments can provide observational accuracies of approximately one milliarcsecond Also the traditional reference frame based on the Fundamental Catalog of bright stars is being replaced by the extragalactic reference frame based on radio sources with accuracies of one milliarcsecond Thus astrometry will change from a fundamental reference frame defined in terms of the dynamical reference frame of the solar system with accuracies of 100 milliarcseconds to a space fixed extragalactic reference frame with accuracies of one milliarcsecond Future astrometric observations should be in the 1-100 milliarcsecond accuracy range There are a number of concepts for future astrometric instruments in space Most of these can provide sub milliarcsecond astrometric accuracies

The Book of Popular Science, 1929 *Conceptions of Cosmos* Helge Kragh, 2007 This book is a historical account of how natural philosophers and scientists have endeavoured to understand the universe at large first in a mythical and later in a scientific context Starting with the creation stories of ancient Egypt and Mesopotamia the book covers all the major events in theoretical and observational cosmology from Aristotle's cosmos over the Copernican revolution to the discovery of the accelerating universe in the late 1990s It presents cosmology as a subject including scientific as well as non scientific dimensions and tells the story of how it developed into a true science of the heavens Contrary to most other books in the history of cosmology it offers an integrated account of the development with emphasis on the modern Einsteinian and post Einsteinian period Starting in the pre literary era it carries the story onwards to the early years of the 21st century
