[Adventures of a Young Naturalist](#) Lucien Biart, 2011-09-19 There is no country on the face of the earth that possesses greater interest in the eyes of the scientific or travelled than Mexico the scene where the adventures so graphically and clearly narrated in this volume transpired nor is this partiality to be wondered at when we recall to memory what a lavish hand Nature has subtended to her Although several of our most celebrated naturalists have climbed its lofty volcanic mountains explored its lagoons and giant rivers and traversed its immense forests still from the vast extent of that country and variety of climate caused by difference of elevation much yet remains to be done ere the public become thoroughly conversant with its arboreal and zoological productions
