Solar Ethics

Shailer Mathews, Gerald Birney Smith

Solar Ethics:

Solar Ethics Don Cupitt,1995 Don Cupitt s ethics may seem strange and furious but he says that this is a religious ethic to fit the truth about the world and our own life as we now understand it A Textbook of Christian Ethics, 3rd Edition Robin Gill,2006-09-14 Robin Gill s Textbook of Christian Ethics has been a popular course book with students and lecturers for over 20 years Now in its third edition this classic textbook has been completely revised to bring it up to date with recent developments in the field of Christian Ethics All the popular features of the previous editions have been retained in this new edition The book s main strength has always been its layout and structure Integrating primary texts with explanatory material from the author the book provides the student with a reader and textbook combined The new edition focuses more strongly on current debates in all sections and expands on a variety of topics with contributions on natural law approaches virtue ethics in a pluralistic postmodern world the influential notion of the common good just war theory genetics and biotechnology euthanasia and global justice and sex and gender issues Important modern contributions to Christian ethics are set out alongside classical texts from Augustine Aquinas and Luther The modern writers range from thinkers such as Niebuhr Barth and Bonhoeffer to recent liberation and Third World theologians Each series of texts is systematically analysed The differing ethical positions and arguments are examined together with the social and historical factors which shaped them **Solar Ethics - Urban Form** Ralph L. Knowles,1978 **A Textbook of Christian Ethics** Robin Gill,2014-01-16 Robin Gill s A Textbook of Christian Ethics continues to be popular with students and lecturers it is difficult to find another textbook in the field that combines primary texts with extensive analysis and commentary This 4th edition has been extensively revised and it incorporates up to date developments in the field of Christian ethics Gill retains all the popular features of the previous editions including its layout and structure and in this new edition he also focuses on current debates including such topics as global Christianity global economics euthanasia and global justice and the environment

Beyond Spaceship Earth Eugene C. Hargrove,1986 Studie over de gevolgen van onderzoek en exploitatie in de ruimte voor de mens en voor het milieu van het heelal Engineering the Climate Christopher J. Preston,2012-06-28 Engineering the Climate The Ethics of Solar Radiation Management discusses the ethical issues associated with deliberately engineering a cooler climate to combat global warming Climate engineering also known as geoengineering has recently experienced a surge of interest given the growing likelihood that the global community will fail to limit the temperature increases associated with greenhouse gases to safe levels Deliberate manipulation of solar radiation to combat climate change is an exciting and hopeful technical prospect promising great benefits to those who are in line to suffer most through climate change At the same time the prospect of geoengineering creates huge controversy Taking intentional control of earth s climate would be an unprecedented step in environmental management raising a number of difficult ethical questions One particular form of geoengineering solar radiation management SRM is known to be relatively cheap and capable of bringing

down global temperatures very rapidly However the complexity of the climate system creates considerable uncertainty about the precise nature of SRM s effects in different regions The ethical issues raised by the prospect of SRM are both complex and thorny They include 1 the uncertainty of SRM s effects on precipitation patterns 2 the challenge of proper global participation in decision making 3 the legitimacy of intentionally manipulating the global climate system in the first place 4 the potential to sidestep the issue of dealing with greenhouse gas emissions and 5 the lasting effects on future generations It has been widely acknowledged that a sustained and scholarly treatment of the ethics of SRM is necessary before it will be possible to make fair and just decisions about whether or how to proceed This book including essays by 13 experts in the field of ethics of geoengineering is intended to go some distance towards providing that treatment *The Ethics of Climate Engineering* Toby Svoboda,2017-05-25 This book analyzes major ethical issues surrounding the use of climate engineering particularly solar radiation management SRM techniques which have the potential to reduce some risks of anthropogenic climate change but also carry their own risks of harm and injustice The book argues that we should approach the ethics of climate engineering via non ideal theory which investigates what justice requires given the fact that many parties have failed to comply with their duty to mitigate greenhouse gas emissions Specifically it argues that climate justice should be approached comparatively evaluating the relative justice or injustice of feasible policies under conditions that are likely to hold within relevant timeframes Likely near future conditions include pessimistic scenarios in which no available option avoids serious ethical problems The book contends that certain uses of SRM can be ethically defensible in some pessimistic scenarios This is the first book devoted to the many ethical issues surrounding climate engineering Environmental Education ,2008-01-01 In *Environmental Education Identity Politics and Citizenship* the editors endeavor to present views of environmental educators that focus on issues of identity and subjectivity and how narrated lives relate to questions of learning education politics justice and citizenship What is distinctive about this collection is that it highlights the views of Latin American scholars alongside those of scholars from Spain Canada New Zealand Taiwan South Africa Australia and U S The result is a philosophically nuanced reading of the complexities of environmental education that begins to reshape the landscape in terms of ethics ontology epistemology and politics The collection bears the stamp of the location of its contributors and strongly reflects an activist qualitative and ethnographic orientation that emphasizes the ground for action the identity of environmental actors and the contribution that education in all its forms can make to sustainability and the cause of the environment At the same time contributors go beyond simple slogans and ideologies to question the accepted truths of this rapidly emerging field Cover picture Edgar Gonz lez Gaudiano Siem Reap Cambodia December 2007

realist theologies postmodern theologies and the theology of radical orthodoxy has provoked a vibrant debate about the nature of theology itself In what new directions should theology be moving in the wake of the end of modernity For over thirty years Don Cupitt has been provoking theologians to reconsider the nature of their discipline Taking their inspiration from his work and writing in his honour on the occasion of his 70th birthday some of the leading figures in the contemporary theological scene address urgent questions facing theology today and in doing so exemplify the methodological diversity which characterises the contemporary field
