Solar Selective Surfaces:

Solar Selective Surfaces O. P. Agnihotri, B. K. Gupta, 1981-04-13 Covers the design production evaluation and application of surfaces having high absorptance in the solar spectrum and low emittance at the operating temperature of the solar collection system Presents current significant data on the enhancement of solar collector efficiency by the use of selective surfaces Characterization of Solar Selective Surfaces at High Temperatures Jürgen Eitle, 1992 *Sputtered Solar Selective Surfaces* Stuart Craig, 1982 *Solar Selective Coatings*, 1977 The definition fabrication and specification of solar selective absorber surfaces are discussed Also the nature of solar radiation and thermal radiation in relation to selective surfaces is considered WHK Solar Selective Absorbers Belal Usmani, Ambesh Dixit, Vivek Vijay, Rahul Chhibber, 2024-11-29 *Solar Selective Absorbers Materials Coatings and Applications* covers different harnessing technologies for solar energy electromagnetic radiation including design principles and different types of spectrally selective coatings The book emphasizes experimental methods for synthesizing these coating structures and characterization techniques to quantify the absorber characteristics suitable for solar thermal applications It also provides a compact review of the literature on solar spectrally selective absorber materials and coatings Summarizes the materials deposition and characterization techniques and applications of solar selective absorbers Introduces solar selective absorber materials and photothermal technology Explores electrodeposition techniques and their use in the development of solar selective absorber films Provides understanding of solar selective absorber materials and coating techniques in photothermal technology Explains sputtering techniques and their use in the development of ZrO₂ ZrC ZrN Zr tandem structure based solar selective absorber films The book is aimed at researchers and graduate students in solar energy solar thermal conversion and materials science

Thermal Radiation Heat Transfer, Fourth Edition Robert Siegel, 2001-12-07 This extensively revised 4th edition provides an up to date comprehensive single source of information on the important subjects in engineering radiative heat transfer It presents the subject in a progressive manner that is excellent for classroom use or self study and also provides an annotated reference to literature and research in the field The foundations and methods for treating radiative heat transfer are developed in detail and the methods are demonstrated and clarified by solving example problems The examples are especially helpful for self study The treatment of spectral band properties of gases has been made current and the methods are described in detail and illustrated with examples The combination of radiation with conduction and or convection has been given more emphasis and has been merged with results for radiation alone that serve as a limiting case this increases practicality for energy transfer in translucent solids and fluids A comprehensive catalog of configuration factors on the CD that is included with each book provides over 290 factors in algebraic or graphical form Homework problems with answers are given in each chapter and a detailed and carefully worked solution manual is available for instructors *Selective Surfaces for Solar Collectors* Ralph James Pearce, 1981 Design of Selective Surfaces for Solar Energy Collection D.
