Cosmic Connection Jeff Kanipe,2009 In this sweeping tour of the cosmos and our place within it acclaimed science writer Jeff Kanipe shows the many ways we are connected to the vast universe we inhabit Long before our apelike ancestors dropped from the trees and began playing with fire even before the Sun emerged from its chrysalis of dust and irradiated its brood of planets numberless and nameless astronomical events affected Earth and its emerging life forms Our chemical makeup from the iron in our blood to the calcium in our bones derives from stars that lived and died hundreds of millions of years ago Comets have showered organic molecules into our oceans and asteroid impacts have wiped out predominant species that lived before Tracing the whole natural history of how events in the near and far universe have influenced life on Earth today and how they might influence life in the future Kanipe with unparalleled eloquence explores a host of intriguing questions How the Earth s orbit and inclination have triggered past ice ages The role ancient supernovae may have played in mass extinctions and genetic changes How a slight but persistent dip in solar output contributed to a multicentury cooling event called the Little Ice Age How ancient asteroid impacts pressed Earth s evolutionary reset button and how astronomers are striving to make sure that it won t happen again The widespread effects that our Sun s changing galactic environment has on life and climate Kanipe also reflects upon the possible societal effects of alien contact a type of cosmic intervention that some astronomers believe could happen within the next few decades His elegant jargon free descriptions of the truly big picture view of life on Earth will fascinate and inform everyone who has an interest in astronomy the evolution of our planet and the future of humankind

The Cosmic Connection Snehlata Chakraburty, 2001-01-01 *The Cosmos as Garden - A pictorial contemplation of Chinese Private Gardens and their role in the alteration of time and space* Jürgen Hirschmann, 2009-07-03

Diploma Thesis from the year 2009 in the subject Landscape Management grade Sehr gut University of Natural Resources and Applied Life Sciences Vienna language English abstract

Although China cultural as well as political is opening up since about thirty years, the Chinese manner of celebration, except of few exemptions, has still kept refused most people in the western world. Primarily, this has to do with the ancient Chinese ideology self. The Chinese, who are calling their country The Empire of the Middle, were on principle in the past rarely attempted to leave their nation because the remaining world for them was not really livable. Outside the boundaries, there lived the so-called barbarians, who in ancient times mostly were embodied by brutal Mongolian tribes, who martially tried to infiltrate China, and from them the Chinese had to protect. So they created their own world, a world in the world enclosed by the thousands of meters long Great Wall Chang Cheng. Inside of it, they felt confident and could develop further. This retirement in an enclosed space, and last but not least, the retirement in oneself paved finally the way for their private gardens, in which they could undisturbed find an access to a better world. This essay will deal with these little enclosed garden worlds, these micro cosmos in a macro cosmos. This work consists of a searching for their history and the holistically religious backgrounds, which first made enable these small but coevally infinite universes. It gets to the bottom of the correlations between time and space, establish relationships between narrow and open, bright and dark, and last but not least, inside and outside, which all are parts of an all-containing super ordinate. Great. It makes close connections to landscape paintings and the gardens self, which as major motif threads

through the whole text will find out that they are close correlated to the Great and grapple with the centre of the Whole with the Zero Perspective or the Vapidness in which the human as important part at least can dive in to touch the sky Of course also the framework of a Chinese private garden the several elements are considered without them no garden could exist The role and the important task of their walls will be bespoke the several constructions of their buildings and last but not least the close to the human correlated plants All this aspects will be picked up again at a walkabout through three famous Chinese gardens in Suzhou where the mindfully reader finally will notice that size does not necessarily count in architectural garden space
