## **The Creative Conscience As Human Destiny:**

**The Creative Conscience as Human Destiny** Eduard Hugo Strauch,2004 The Creative Conscience as Human Destiny explains how human nature derived from our biogenetic evolution Whereas human ingenuity and self realization replicate nature s creativity its morphogenesis human conscience epitomizes the integration of organic life its symbiosis These mutual processes became incarnate as humanity s creative conscience Similarly the co evolution of man and woman has enabled us to create cultures and civilization From our intimation of a Supreme Being in nature human beings have also evolved a supraconscience By acknowledging the wisdom of nature we have a philosophy of life for the future

**The Supraconscience of Humanity** Edward H. Strauch,2010-05-25 Humankind evolved through three psychological stages subconsciousness conscience and supraconscience Ritual and myth cosmology and theism marked phases of psychic integration initiating our supraconscience evolution Four archetypes temperance the great chain of being Biblical interpretation and Divinity became the Cosmic consciousness of secular man Study of Scripture developed a communal supraconscience Mystics dedication showed us the deeper meaning of a life purpose Yet heretics taught man faith in the superior power of the free mind Heresy helped evolve humanity s secular supraconscience Indeed the exponential growth of psyche s powers and the continuous revelation of new secular knowledge seems the fulfillment of Revelation Finally the enlightened understood that when God created the earth he included evolution so that our kind would evolve a superior nature Hence religious and scientific secular and humanistic developments reveal themselves to be the primary powers accelerating human evolution Together they have nurtured humankind s ever evolving supraconscience

**The Creative Process** Brewster Ghiselin,1952 Interest is the creative process isn t new Both Plato and Aristotle discussed its intricacies and so have many others over the past two thousand years This unusual collection provides a lively sampling of what 38 writers artists and scientists have had to say about creativity While not always comforting their remarks offer new ways of understanding the creative struggle Discipline and hard work are clearly integral to the process but as editor Brewster Ghiselin notes so too is listening to the voice of eccentricity within ourselves and in the world Page 4 of cover *American Book Publishing Record* ,2003

dogmatism insecurity and defensiveness The anathema of tender mindedness was attached to any study of mental manifestations that avoided laboratory confirmation and statistical significance Man in his uniqueness and unpredictable potentialities remained unexplored Yet outside the systematic vivisection of variables and their measurement men of originality and genius were studying the mind in its complex yet natural interaction of aspirations values and creative capacities It was almost too easy for me to turn to them for the re-orientation of my psychological interest and it was not difficult to find in Freud the most daring and penetrating representant of humanistic psychology Furthermore it could have been the fact that Freud's thoughts on creative processes appeared to me at once starkly original and yet incomplete and fragmentary that led me to reconsider and expand on them Freud's fascination with culture and creativity although frank and serious led him to a peculiar indecisiveness and overcautiousness which was radically different from the dramatic boldness of his therapeutic methods and the depth of his personality theories
