The Future Of Success:

The Future of Success Robert B. Reich, 2001-04-17 If you think it's getting harder to both make a living and make a life economist and former secretary of labor Robert Reich agrees with you Americans may be earning more than ever before but we're paying a steep price we're working longer seeing our families less and our communities are fragmenting With the clarity and insight that are his hallmarks Reich delineates what success has come to mean in our time He demonstrates that although we have more choices as consumers and investors the choices themselves are undermining the rest of our lives It is getting harder for people to be confident of what they will be earning next year or even next month At the same time our society is splitting into socially stratified enclaves the wealthier walled off and gated the poorer isolated and ignored Although the trends he discusses are powerful they are not irreversible and Reich makes provocative suggestions for how we might create a more balanced society and more satisfying lives Some of his ideas may surprise you all should spark a healthy and essential national debate

Future Success Factors of Finance Portals Axel Täubert, 2002-06-05 Inhaltsangabe Abstract The title of this thesis might lead the cursory reader to the assumption that this is another one of countless academic works whose authors have overestimated the prospects of the Internet However this paper lays claim to be one of the early few that take a more rational approach to the subject by analyzing the realistic profit potential of online business models Furthermore future success factors for finance portals will be discussed and their respective value proposition thoroughly examined Since the fast moving Internet hype has had to give way to an almost equally swift consolidation of the market this will prove to be crucial information for any company of the finance industry Additionally when taking into account that the oncoming second wave of customers is to be divided amongst the remaining online players the findings of this thesis will be of eminent relevance for any provider of a financial website Towards the end of my internship with AOL I was asked to research the required success factors for finance portals as a basis for AOL's finance channel content strategy Inexperienced Internet users such as those of the Second Wave are likely to utilize the user friendly and convenient service of AOL as an ISP Therefore it will be of vital importance for AOL to incorporate the above mentioned success factors within their service in order to increase the usage of its finance channel At this point I would like

to thank AOL not only for the financial but especially for the professional support which both have simplified my task to a substantial degree as well as all others who have been kind enough to let me benefit from their knowledge in the field
