Time And The Image:

Time and the Image Carolyn Bailey Gill, 2000 This fascinating and innovative study explores the lives of people living in early modern Ireland through the books and printed ephemera which they bought borrowed or stole from others While the importance of books and printing in influencing the outlook of early modern people is well known recent years have seen significant changes in our understanding of how writing and print shaped lives and was in turn shaped by those who appropriated the written word The author finds that a set of revolutions took place which transformed the lives of the Irish in unexpected ways and that the rise of writing and the spread of print were central to an understanding of those changes which have previously only been understood to have been the result of conquest and colonisation This is a book which will be read not only by those interested in the Irish past but by all those who are concerned with the impact of communications media on social change

Deleuze and Art Anne Sauvagnargues, 2013-08-15 In *Deleuze and Art* Anne Sauvagnargues one of the world's most renowned Deleuze scholars offers a unique insight into the constitutive role played by art in the formation of Deleuze's thought By reproducing Deleuze's social and intellectual references Sauvagnargues is able to construct a precise map of the totality of Deleuze's work pinpointing where key Deleuzian concepts first emerge and eventually disappear This innovative methodology which Sauvagnargues calls periodization provides a systematic historiography of Deleuze's philosophy that remains faithful to his

Images of Blood in American Cinema Kjetil Rødje, 2016-03-09 Through studying images of blood in film from the mid 1950s to the end of the 1960s this path-breaking book explores how blood as an audio-visual cinematic element went from predominately operating as a signifier providing audiences with information about a film's plot and characters to increasingly operating in terms of affect potentially evoking visceral and embodied responses in viewers Using films such as *The Return of Dracula* *The Tingler* *Blood Feast* *Two Thousand Maniacs* *Color Me Blood Red* *Bonnie and Clyde* and *The Wild Bunch* Rødje takes a novel approach to film history by following one audio-visual element through an exploration that traverses established standards for film production and reception This study does not heed distinctions regarding to genres horror western gangster or models of film production exploitation independent studio productions but rather maps the operations of cinematic images across marginal as well as more traditionally esteemed cinematic territories The result is a book that rethinks and reassembles cinematic practices as well as aesthetics and as such invites new ways to investigate how cinematic images enter relations with other images as well as with audiences
