Communicate and interact effectively with key stakeholders and professionals within the industry. Understand in straightforward terms where they can have a positive impact on the project. Put in place a client side due diligence process. Reduce their institutional risk and the risk of project failure. Discover how their standard models are able to co-exist and even transfer to a common client side procedure for managing a construction project. Written by clients for clients, this book is highly recommended not only for clients but for construction industry professionals who want to develop their own skills and enhance their working relationship with their clients.
