Wagoner, 2022-09-22 To interrupt both on stage and off is to wrest power From the Ghost's appearance in Hamlet to Celia's frightful speech in Volpone interruptions are an overlooked linguistic and dramatic form that delineates the balance of power within a scene This book analyses interruptions as a specific form in dramatic literature arguing that these everyday occurrences when transformed into aesthetic phenomena reveal illuminating connections between characters between actor and audience and between text and reader Focusing on the works of William Shakespeare Ben Jonson and John Fletcher Michael M Wagoner examines interruptions that occur through the use of punctuation and stage directions as well as through larger forms such as conventions and dramaturgy He demonstrates how studying interruptions may indicate aspects of authorial style emphasizing a playwright's use and control of a text and how exploring relative power dynamics pushes readers and audiences to reconsider key plays and characters providing new considerations of the relationships between Othello and Iago or Macbeth and the Ghost of Banquo **Remaking Home** Maja Korac, 2009 Rather than emphasising boundaries and territories by examining the integration and acculturation of the immigrant or the refugee this book offers insights into the ideas and practices of individuals settling into new societies and cultures It analyses their ideas of connecting and belonging their accounts of the past the present and the future the interaction and networks of relations practical strategies and the different meanings of home and belonging that are constructed in new sociocultural settings The author uses empirical research to explore the experiences of refugees from the successor states of Yugoslavia who are struggling to make a home for themselves in Amsterdam and Rome By explaining how real people navigate through the difficulties of their displacement as well as the numerous scenarios and barriers to their emplacement the author sheds new light on our understanding of what it is like to be a refugee *The Official Gazette* Barbados, 1918 Supplements contain abstracts of House of Assembly and Legislative Council debates *Talking Difference* Mary Crawford, 1995-08-11 I love the warmth and wit in this book but I say this in no way to detract from the seriousness of its subject matter and its incisive treatment by Mary Crawford this is a great book and an important book which articulates current critical thinking about research around gender and language Mary Crawford writes brilliantly powerfully and lucidly I thoroughly recommend it British Psychological Society Psychology of Women Section Newsletter This refreshing re-evaluation of current wisdom both academic and popular about men's and women's language critically assesses the abundant social science research of recent years and its representation in the mass media Exploring a wide range of topics from Augmentation of Brain Function: Facts, Fiction and Controversy Ioan Opris, Manuel F. Casanova, Mikhail Lebedev

,2018-09-14 The Volume II is entitled Neurostimulation and pharmacological approaches This volume describes augmentation approaches where improvements in brain functions are achieved by modulation of brain circuits with electrical or optical stimulation or pharmacological agents Activation of brain circuits with electrical currents is a conventional approach that includes such methods as i intracortical microstimulation ICMS ii transcranial direct current stimulation tDCS and iii transcranial magnetic stimulation TMS tDCS and TMS are often regarded as noninvasive methods Yet they may induce long lasting plastic changes in the brain This is why some authors consider the term noninvasive misleading when used to describe these and other techniques such as stimulation with transcranial lasers The volume further discusses the potential of neurostimulation as a research tool in the studies of perception cognition and behavior Additionally a notion is expressed that brain augmentation with stimulation cannot be described as a net zero sum proposition where brain resources are reallocated in such a way that gains in one function are balanced by costs elsewhere In recent years optogenetic methods have received an increased attention and several articles in Volume II cover different aspects of this technique While new optogenetic methods are being developed the classical electrical stimulation has already been utilized in many clinically relevant applications like the vestibular implant and tactile neuroprosthesis that utilizes ICMS As a peculiar usage of neurostimulation and pharmacological methods Volume II includes several articles on augmented memory Memory prostheses are a popular recent development in the stimulation based BMIs For example in a hippocampal memory prosthesis memory content is extracted from hippocampal activity using a multiple input multiple output non linear dynamical model As to the pharmacological approaches to augmenting memory and cognition the pros and cons of using nootropic drugs are discussed **The Atlanta University Bulletin** Atlanta University,1954 The Socialist Review ,1920
