Young Body:

Body Work Julia Coffey, 2016-03-10 The rise of the health beauty and fitness industries in recent years has led to an increased focus on the body Body image gender and health are issues of long standing concern in sociology and in youth studies but a theoretical and empirical focus on the body has been largely missing from this field This book explores young people s understandings of their bodies in the context of gender and health ideals consumer culture individualisation and image Body Work examines the body in youth studies It explores paradoxical aspects of gendered body work practices highlighting the contradiction in men s increased participation in these industries as consumers alongside the re emphasis of their gendered difference It explores the key ways in which the ideal body is currently achieved via muscularising practices slimming regimes and cosmetic procedures Coffey investigates the concept of health and how it is inextricably linked both to the bodily performance of gender ideals and an increased public emphasis on individual management and responsibility in the pursuit of a healthy body This book s conceptual framework places it at the forefront of theoretical work concerning bodies affect and images particularly in its development of Deleuzian research It will appeal to a wide range of scholars and students in fields of youth studies education sociology gender studies cultural studies affect and body studies

Learning Bodies Julia Coffey, Shelley Budgeon, Helen Cahill, 2016-02-03 Learning Bodies addresses the lack of attention paid to the body in youth and childhood studies Whilst a significant range of work on this area has explored gender class race and ethnicity and sexualities all of which have bodily dimensions the body is generally studied indirectly rather than being the central focus This collection of papers brings together a scholarly range of international interdisciplinary work on youth with a specific focus on the body The authors engage with conceptual empirical and pedagogical approaches which counteract perspectives that view young people s bodies primarily as problems to be managed or as sites of risk or deviance The authors demonstrate that a focus on the body allows us to explore a range of additional dimensions in seeking to understand the experiences of young people The research is situated across a range of sites in Australia North America Britain Canada Asia and Africa drawing on a range of disciplines including sociology education and cultural studies in the process This collection aims to demonstrate theoretically empirically and pedagogically the implications that emerge from a reframed approach to understanding children and youth by focusing on the body and embodiment

Sum of Memories David Corby, 2010-06-25 People dream of transferring their soul to a younger body but What makes me me Am I the body that everyone recognises then if it is deformed do I cease to be me Am I my personality do I become a different person if I go through a life changing experience Am I a spirit an empty life force that becomes me through a unique experience of life Jonathan wakes up one morning feeling better than he has done for months How can it be that when he looks in the mirror it is his son in the reflection
