Remote Work, Internal Marketing and Human Resource Management Teena Mishra, 2024-12-02 Remote working is a developing idea that many organizations are embracing especially in light of COVID 19 and the rise in demand for remote and hybrid roles. As there is no standard model to use for implementation, a number of problems and difficulties develop as popularity increases and hybrid working environments become normalized. This book presents the views, opinions, and reality of remote work and creating an appropriate internal marketing culture in a remote environment. The key topics explored are the significance of remote work, remote work practice, reshaping the work environment, designing remote work models, remote work challenges, remote work facing business organizations, remote work management innovations and technology, the role of motivation and satisfaction in organizational development, employee empowerment in a remote setting, transparency and commitment for sustainable development, and the future of remote work. This research volume will be of value to researchers, academicians, practitioners, and students in the fields of human resource management, organizational studies, and innovation management.

Industry 5.0's Impact on Economic Innovation Oskounejad, Mohammad Mehdi, Nozari, Hamed, 2025-12-23 With the rise in the use of technology, economic innovation shows significant advancements in the industry. Humans now use collaborative technologies such as robotics and artificial intelligence (AI) tools to revolutionize businesses and organizations. As a result, production processes and marketplaces have quickly evolved, increasing efficiency and influencing consumer behavior. The use of green technology improves business practices, driving them towards more sustainable procedures. Further examination may reveal that advanced technology can be harnessed to foster human creativity and create a more sustainable economy. Industry 5.0's Impact on Economic Innovation explores the impact of technology on human innovation, business practices, and sustainability. It examines various business sectors including finance, supply chain, marketing, and manufacturing. Covering topics such as apparel, consumption, blockchain, and machine vision, this book is an excellent resource for business leaders, human resource managers, computer scientists, manufacturers, financial analysts, industrial engineers, professionals, researchers, scholars, academicians, and more.

Ethical Artificial Intelligence in Power Electronics Tarandeep Kaur Bhatia, Salma El Hajjami, Keshav Kaushik, Gayo Diallo, Mariya Ouassa, Inam Ullah Khan, 2024-08-01 This book focuses on the techniques of artificial intelligence that are mainly used in the power electronics field for the optimization of lost vehicle power. With the intention of optimizing the powerful energy of the vehicles and producing reliable energy, the most efficient methods, algorithms, and strategies of ethical artificial intelligence (AI) are being applied. By employing machine learning methods, the optimization of power energy in vehicles can be quickly recovered and managed efficiently. In today's bustling world, power energy is indispensable for progress, yet in congested Vehicular Ad hoc Networks (VANETs), vehicles often face power depletion and decreased efficiency. This book explores these challenges encompassing not only power but also other critical power electronics within vehicles. We aim to introduce

innovative approaches leveraging ethical AI methods to optimize energy performance in the face of these difficulties Through this exploration we seek to provide practical insights into navigating congested VANET environments while upholding ethical principles in technological advancements Our book will discuss the current power energy concerns faced by vehicles and also contribute a novel strategy to overcome those concerns The employment of ethical AI in vehicular power energy will undoubtedly improve the effectiveness and production of vehicles
