## **Carbon Footprint Checklist:**

*Carbon Footprints as Cultural-Ecological Metaphors* Anita Girvan, 2017-10-10 Through an examination of carbon footprint metaphors this book demonstrates the ways in which climate change and other ecological issues are culturally and materially constituted through metaphor. The carbon footprint metaphor has achieved a ubiquitous presence in Anglo North American public contexts since the turn of the millennium yet this metaphor remains under examined as a crucial mediator of political responses to the urgent crisis of climate change. Existing books and articles on the carbon footprint typically treat this metaphor as a quantifying metric with little attention to the shifting mediations and practices of the carbon footprint as a metaphor. This gap echoes a wider gap in understanding metaphors as key figures in mediating more than human relations at a time when such relations profoundly matter. As a timely intervention this book addresses this gap by using insights from environmental humanities and political ecology to discuss carbon footprint metaphors in popular and public texts. This book will be of great interest to researchers and students of environmental humanities, political ecology, environmental communication and metaphor studies.

**A Practical Guide to Greener Theatre** Ellen Jones, 2013-10-30 Protecting the environment should be a priority of every theatrical production but it can be challenging to mount an environmentally friendly show with limited time resources and information. *A Practical Guide to Greener Theatre: Introduce Sustainability Into Your Productions* not only gives you the information you need to make greener decisions but provides you with practical workable solutions. You will learn how to assess and improve every production area from costuming and painting, lighting and technical direction to administrative offices and the rehearsal process. Checklists, examples of successful strategies and step by step instructions will show you how to identify areas where manageable sustainable changes can make your productions greener and advice from working professionals with experience greening their own productions will leave you confident that your processes are environmentally sound. Even non technical people who find themselves responsible for supervising productions will find green solutions that can be instituted with a staff of volunteers or students. Remember every step toward sustainability is a step forward. Discover small fixes that will make your theatre productions greener. Examine ways to introduce greener practices in the design, execution and strike process. Explore how introducing sustainability into your theatre productions can save your company time and money. Learn how sustainability and safety intersect to help protect your workers and volunteers.

*Build Like It's the End of the World* Sandeep Ahuja, Patrick Chopson, 2024-09-18 Authoritative roadmap to the design and construction of a carbon positive built environment. *Build Like It's the End of the World* stands as a compelling manifesto for the AEC industry confronting the urgent challenges of climate change with actionable solutions. Authored by Sandeep Ahuja and Patrick Chopson this text embarks on a journey to redefine the future of our built environment. Through a lens of decarbonization it challenges

established norms and introduces a new benchmark for sustainable design and construction. This book not only advocates for a radical shift in design and construction philosophy but also provides a concrete blueprint for achieving carbon positivity in our projects and practices. The authors bring their extensive experience and research to the forefront, offering a guide that marries rigorous analytical methods with practical applications. It is a call to action, urging professionals and students alike to embrace innovative technologies and strategies that can lead to significant changes in how we conceive and construct our spaces. Within its pages, readers will find a comprehensive strategy for carbon positive design, a detailed blueprint showcasing step by step how sustainable practices can be integrated into projects, drawing on the authors' vast experience and thorough research. Engaging tools for practical implementation bridge the gap between high level sustainability goals and their execution, providing readers with learning objectives, instructional activities, and compelling case studies. Insights on embedding sustainable practices offer valuable perspectives on incorporating carbon positive principles into existing workflows, highlighting the simplicity and profound impact of these efforts. The economic and cultural case for sustainable buildings demonstrates the viability and necessity of carbon positive buildings, emphasizing the importance of a cultural shift towards decarbonization in the construction industry. *Build Like It's the End of the World* is an essential read for anyone in the AEC field looking to navigate the complexities of decarbonization of buildings. It serves as a powerful testament to the role of technology and strategic innovation in transforming the industry, guiding us towards a future where our buildings play a pivotal role in the health of our planet. Sustainability Appraisal Barry Dalal-Clayton, Barry Sadler, 2014-03-26

*Sustainability Appraisal* is a sourcebook of the state of the art of this rapidly emerging and diversifying area. It draws on a wealth of international experiences and approaches to illustrate the status and scope of Sustainability Appraisal Assessment SA. This comprehensive guide highlights how SA can be used to analyse and integrate the key environmental, social, and economic pillars of sustainability into decision making at all levels, from policy to project to investment, by government, business, and industry, or international organizations. Distilling both published and unpublished materials, and with contributions from a range of leading experts, organizations, and agencies, this book will be of significant value to professionals everywhere who are in need of a solid reference guide to what constitutes SA practice, and more importantly, how and when it can be applied. *CUET-UG Anthropology [303] Question Bank Book 2500+MCQ Unit Wise with Explanation As Per Updated Syllabus* DIWAKAR EDUCATION HUB, 2024-01-14. *CUET UG Anthropology Question Bank 2500 Chapter wise question With Explanations As per Updated Syllabus* cover all 5 Units. Carbon Taxes in the EEC](#) Matthias Beer, 2013-09-11 Studienarbeit aus dem Jahr 2012 im Fachbereich BWL Investition und Finanzierung Note 1 3 FOM Hochschule f r Oekonomie Management gemeinn tzige GmbH M nchen fr her Fachhochschule Veranstaltung MBA Sprache Deutsch Abstract Executive Summary Global warming is becoming a serious issue around the world On a daily base the effects of global warming can be seen and the number of related natural catastrophes is increasing every year The global warming effect is directly re lated to the greenhouse gases GHG which are freed when fossil fuels are burned In this process carbon dioxide is produced and rises into the atmosphere where it is causing global warming due to reflection of infrared As a counter measure with the aim to reduce the GHGs the Kyoto Protocol was signed on 11th of December 1997 In this regards many policy mechanisms to reduce GHG emissions are discussed and are already exists Scholars are predicting that the mechanism with the strongest effect is pricing on carbon This assignment is explaining briefly the background of carbon dioxide and provides also a short introduction of the carbon footprint of products and enterprises The main part of the work deals with economical aspects of carbon taxation The chapter is analyzing the greenhouse emission trends since 1990 and derives the affected industry sectors for carbon taxation Further the cost of carbon taxation in the EEC is evaluated and an

estimated cost increase for a 4 person household in the European member states given The finding of this assignment is that carbon taxation in the EEC is useful and is raising the motivation to develop engines that are more efficient and in addition encourage alternative energy sources At the same time there are also risks involved in carbon taxation if this is only a European decision rather than a global strategy In that case future investments are potentially done outside the EEC due to lower or even no taxation on carbon emission
